NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-321 and 50-366]

Georgia Power Co., et al.; Partial Withdrawal of Application for Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Georgia Power Company, et al. (the licensee), to withdraw a proposed revision to the local power range monitor (LPRM) calibration frequency which was included in its February 25, 1994, application for proposed amendments to Facility Operating License Nos. DRP-57 and NPR-5 for the Hatch Nuclear Plant, Unit Nos. 1 and 2, located in Appling County, Georgia.

The Commission had previously issued a Notice of Consideration of Issuance of Amendments published in the **Federal Register** on August 18, 1995 (59 FR 42607).

The amendments, which were issued March 3, 1995, replaced the previous Technical Specifications and associated Bases with a set based on the new Boiling Water Reactor (BWR) Owners Group Standard Technical Specifications, NUREG-1433, "Standard Technical Specifications General Electric Plants, BWR/4." However, the increase of the LPRM calibration frequency could not be approved without further justification because it was outside the scope of the conversion to NUREG-1433.

By letter dated August 7, 1995, the licensee requested that the LPRM revision be withdrawn, and stated that it would pursue the change as a separate issue.

For further details with respect to this action, see (1) the application for amendments dated February 25, 1995, as supplemented by letters dated July 8, August 8 and 31, September 23, October 19, and November 1, 1994, and January 19, 1995 (two letters), (2) Amendments 195 and 135 to Facility Operating Licenses DPR-57 and NPF-5 dated
