

devices. Further, EPA proposes that this submittal satisfies the one remaining commitment made by the State in a previous PM₁₀ SIP submittal.

In the Final Rules Section of this **Federal Register**, EPA is acting on the State's SIP revisions as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision amendment and anticipates no adverse comments. A detailed rationale for EPA's action is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated and the direct final rule will become effective. If EPA receives adverse comments, the direct final rule will be withdrawn before the effective date by publishing a subsequent document that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on this action serving as a proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting on this document should do so at this time.

ACTION: Proposed rule.

SUMMARY: EPA is proposing full approval of Maine's request to redesignate the Presque Isle area to attainment for particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM₁₀), along a maintenance demonstration and contingency plans which outline Maine's control strategy for maintenance of the PM₁₀ national ambient air quality standards (NAAQS). If no adverse comments are received in response to that direct final rule, no further activity is contemplated in relation to this proposed rule.
