

retrieval software make possible indexing of documents by content and the rapid retrieval of documents containing the desired information. The reviewer can electronically survey the document and copy or print those sections of the document that contain the required information. Electronic submissions will reduce the short-term and long-term storage space requirements and facilitate long-term retrieval of information.

B. Facilitate the Writing of Reviews

Currently, tabular or graphic material derived from a sponsor's paper submissions are either optically scanned and merged into a review or photocopied and physically pasted into a printed paper copy of a review. In the latter case, the table will not appear in electronic archival copies of the reviews. Electronic submissions will facilitate the ability of reviewers to copy portions of text, "cut and paste" tables or graphs, and incorporate them into a review. They will also allow the transfer of digital photographic images of histopathology or other images into a review in the near future.

C. Obtain Experience with Reviewing Electronic P/T Submissions and Make Recommendations for Expansion of the Pilot Program to Routine Use, Including Possible Elimination of Paper Submissions

The P/T IT Subcommittee intends to gain experience with the review of electronic P/T submissions, evaluate that experience, and develop recommendations on how electronic submissions can be used most efficiently in the P/T program. If electronic submissions can be successfully incorporated, CDER may consider acceptance of only electronic submissions. (See 59 FR 45160, August 31, 1994.) During the initial phase of the pilot program, CDER has a goal of receiving at least 10 toxicology study reports electronically. CDER now has sufficient LAN capacity and staff experience to review these submissions. CDER plans to complete the initial phase of the pilot project and issue a final report with recommendations by the end of 1995.

III. General Specifications for the Electronic Submission of Pharmacology and Toxicology Reports

A. Eligible Submissions

All preclinical P/T study reports are eligible for electronic submission. A paper copy must also be submitted.

B. Desirable Electronic Capabilities

- Complete text, tables, and graphics.
- Word search capability within a document and, if possible, between documents.
- Copy, print, cut, and paste capability.
- Index and abstract or document summary containing major subject and topic key words to facilitate document search and retrieval.

C. Hardware Specifications

- Optical disks (CDROM).
- Read only DOS diskettes.
- DOS 6.0 compatible hard disks.
- Tape, 4/8 millimeter.

—Hardware should be discussed with the Division of Information Systems Design (DISD) before submission.

D. Software Specifications

- WordPerfect 5.1 (DOS) or 6.0a (for Windows) or Microsoft Word 6.0.
- ASCII text with associated graphic format files (e.g., TIFF or equivalent for tables and graphics).
- Text/tabular format for tables is preferred.

E. Reviewer Access

Electronic submissions will be loaded into the CDER LAN by DISD. Electronic submissions will be accessible on personal computer workstations by authorized reviewers via the CDER LAN.
