Federal Register Notice of Amendment To Change Reclamation Milestone Dates in Source Material License SUA-648 Held by Umetco Minerals Corporation

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Amendment of Source Material License SUA-648 to change reclamation milestone dates.

SUMMARY: Notice is hereby given that the U.S. Nuclear Regulatory Commission has amended Umetco Mineral Corporation's (Umetco's) Source Material License SUA-648 to change the reclamation milestone dates. This amendment was requested by

Umetco by letter dated April 21, 1995, and its receipt by NRC was noticed in the **Federal Register** on June 21, 1995.

The license amendment modifies License Condition 59 to change the completion dates for four site-reclamation milestones. The new dates approved by the NRC extend completion of (1) placement of final radon barrier on the A-9 Impoundment by one year, and (2) placement of erosion protection on the Inactive Impoundment, the A-9 Impoundment, and the Heap Leach Impoundment by one year. Umetco attributes the delays to (1) NRC's re-examination of cover design for performance with current standards and practices, and (2) short construction season at the Gas Hills site. Based on review of Umetco's submittal, the NRC staff concludes that the delays are attributable to factors beyond the control of Umetco, the proposed work is scheduled to be completed as expeditiously as practicable, and the added risk to the public health and safety is not significant.

An environmental assessment is not required since this action is categorically excluded under 10 CFR 51.22(c)(11), and an environmental report from the licensee is not required by 10 CFR 51.60(b)(2).

SUPPLEMENTARY INFORMATION: Umetco's license, including an amended License Condition 59, and the NRC staff's technical evaluation of the amendment request are being made available for public inspection at the Commission's Public Document Room at 2120 L Street, NW (Lower Level), Washington, DC 20555.
