Unless a request is withdrawn by the registrant within 90 days of publication of this notice, orders will be issued cancelling all of these registrations. Users of these pesticides or anyone else desiring the retention of a registration should contact the applicable registrant directly during this 90-day period. Two of the registrations for which voluntary

cancellation has been requested 000876-0280, *Technical Chlordane*; 000876-00288, *Technical Heptachlor* are registrations granted by EPA to Velsicol Chemical Corporation in 1978 for "export-only"; these particular registrations have never authorized sale or use in the United States. EPA does not believe that "export-only" registrations are appropriate under FIFRA, and intends to grant Velsicol's request for voluntary cancellation of these registrations thirty (30) days after publication of this notice. After the registrations are cancelled, EPA will permit continued exports of chlordane and heptachlor only if such exports are consistent with all the requirements of section 17 of FIFRA, including the labeling and purchaser-acknowledgement provisions of section 17(a). The following Table 2 includes the names and addresses of record for all registrants of the products in Table 1, in sequence by EPA Company Number.

### III. Loss of Active Ingredients

Unless the requests for cancellation are withdrawn, one pesticide active ingredient will no longer appear in any registered products. Those who are concerned about the potential loss of this active ingredient for pesticidal use are encouraged to work directly with the registrant to explore the possibility of their withdrawing the request for cancellation. The active ingredient is listed in the following Table 3, with the EPA Company and CAS Number.

TABLE 3. — ACTIVE INGREDIENTS WHICH WOULD DISAPPEAR AS A RESULT OF REGISTRANTS' REQUESTS TO CANCEL

Cas No.	Chemical Name	EPA Company No.
53404-28-7	Dicamba, monoethanolamine salt	004822

### IV. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to James A. Hollins, at the address given above, postmarked before December 6, 1995. This written withdrawal of the request for cancellation will apply only to the applicable 6(f)(1) request listed in this notice. If the product(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling. The withdrawal request must also include a

commitment to pay any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

### V. Provisions for Disposition of Existing Stocks

The effective date of cancellation will be the date of the cancellation order. The orders effecting these requested cancellations will generally permit a registrant to sell or distribute existing stocks for 1-year after the date the cancellation request was received. This policy is in accordance with the Agency's statement of policy as prescribed in **Federal Register** No. 123,

Vol. 56, dated June 26, 1991. Exceptions to this general rule will be made if a product poses a risk concern, or is in noncompliance with reregistration requirements, or is subject to a data call-in. In all cases, product-specific disposition dates will be given in the cancellation orders.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation action. Unless the provisions of an earlier order apply, existing stocks already in the

hands of dealers or users can be distributed, sold or used legally until they are exhausted, provided that such further sale and use comply with the EPA-approved label and labeling of the affected product(s). Exceptions to these general rules will be made in specific cases when more stringent restrictions on sale, distribution, or use of the products or their ingredients have already been imposed, as in Special Review actions, or where the Agency has identified significant potential risk concerns associated with a particular chemical.

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Release of draft control techniques guideline (CTG) document for public review.

**SUMMARY:** A draft CTG document for control of volatile organic compound (VOC) emissions from wood furniture finishing and cleaning operations is available for public review and comment. This information document has been prepared to assist States in analyzing and determining reasonably available control technology (RACT) for stationary sources of VOC emissions located within ozone national ambient air quality standard nonattainment areas. The draft document recommends RACT for industries included in, but not limited to, nine Standard Industrial Classification (SIC) codes: Wood Kitchen Cabinets (SIC 2434), Wood Household Furniture, except upholstered (SIC 2511), Wood Household Furniture, upholstered (SIC 2512), Wood Television, Radio, Phonograph, and Sewing Machine Cabinets (SIC 2517), Household Furniture Not Classified Elsewhere (SIC 2519), Wood Office Furniture (SIC 2521), Public Building and Related Furniture (SIC 2531), Wood Office and Store Fixtures (SIC 2541), and Furniture and Fixtures Not Elsewhere Classified (SIC 2599).

**SUPPLEMENTARY INFORMATION:** The docket is available for public inspection at the Office of Air Quality Planning and Standards, Research Triangle Park, North Carolina, which is listed in the **ADDRESSES** section of this notice. The draft control technique guidelines document is also available on the Technology Transfer Network (TTN), on the EPA's electronic bulletin boards. This bulletin board provides information and technology exchange in various areas of air pollution control. The service is free, except for the cost of a telephone call. #### I. Introduction

##### A. Background

Under the Clean Air Act (CAA), as amended in 1990, State implementation plans (SIP's) for ozone nonattainment areas must be revised to require RACT for control of VOC emissions from sources for which the EPA has already published a CTG or for which it will publish a CTG between the date the Amendments were enacted and the date an area achieves attainment status (CAA 182(b)(2)). The EPA has defined RACT as "the lowest emission limitation that a particular source is capable of meeting by the application of control technology that is reasonably available considering the technological and economic feasibility" (44 FR 53761, September 17, 1979).

The CTG's review current knowledge and data concerning the technology and costs of various emissions control techniques. The CTG's are intended to provide State and local air pollution authorities with an information base for proceeding with their own analyses of RACT to meet statutory requirements.

Each CTG contains a "presumptive norm" for RACT for a specific source category, based on the EPA's evaluation of the capabilities and problems general to the category. Where applicable, the EPA recommends that States adopt requirements consistent with the presumptive norm. However, the presumptive norm is only a recommendation. States may choose to develop their own RACT requirements on a case-by-case basis, considering the emission reductions needed to obtain achievement of the national ambient air quality standards and the economic and
