

that the current situation results in unnecessary burdens. The forum is intended to stimulate discussion on means for achieving greater compatibility, coordination, and mutual recognition of competent laboratory accreditations. All interested parties are invited to attend and to express their views.

To date, several task groups have assessed the problems encountered by their communities. The various stakeholders include laboratories and their customers, accreditation organizations, industry, and government at all levels. They report overlapping and contradictory requirements among regulations, contractual specifications, and other voluntary applications, as well as a lack of reciprocity among bodies. The consequent duplication of effort costs time and money and seriously degrades U.S. competitiveness in domestic and global markets.

Laboratories, accreditors, manufacturers, the National Environmental Laboratory Accreditation Conference (NELAC), and government representatives, both federal and state, will present their views. They will discuss the cost of multiple accreditations for individual laboratories; conflicting requirements of those requiring accreditation; special programs tailored to narrow customer or supplier bases; non-uniformity of requirements and lack of reciprocity; international trade implications; and other pertinent factors.

A panel discussion and open exchange of ideas at the October 13 forum will explore concepts for future collaboration that will lead to "one-stop shopping" in laboratory accreditation.
