Those who are concerned about the potential loss of this active ingredient for pesticidal use are encouraged to work directly with the registrant to explore the possibility of their withdrawing the request for cancellation. The active ingredient is listed in the following Table 3, with the EPA Company and CAS Number.

109-86-4	Methoxyethanol	000224 000748

IV. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to James A.

Hollins, at the address given above, postmarked before December 12, 1995. This written withdrawal of the request for cancellation will apply only to the applicable 6(f)(1) request listed in this notice. If the product(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling. The withdrawal request must also include a commitment to pay any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

V. Provisions for Disposition of Existing Stocks

The effective date of cancellation will be the date of the cancellation order. The orders effecting these requested cancellations will generally permit a registrant to sell or distribute existing stocks for 1 year after the date the cancellation request was received. This policy is in accordance with the Agency's statement of policy as prescribed in **Federal Register** No. 123, Vol. 56, dated June 26, 1991. Exceptions to this general rule will be made if a product poses a risk concern, or is in noncompliance with reregistration requirements, or is subject to a data call-in. In all cases, product-specific disposition dates will be given in the cancellation orders.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation action. Unless the provisions of an earlier order apply, existing stocks already in the hands of dealers or users can be distributed, sold or used legally until they are exhausted, provided that such further sale and use comply with the EPA-approved label and labeling of the affected product(s). Exceptions to these general rules will be made in specific cases when more stringent restrictions on sale, distribution, or use of the products or their ingredients have already been imposed, as in Special Review actions, or where the Agency has identified significant potential risk concerns associated with a particular chemical.

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of August 24, 1994 (59 FR 43577), which announced that Safe and Sure Products Company, P.O. Box 5547, Sarasota, FL 34277, had submitted an application to register the pesticide product De-Flea Shampoo Concentrate an insecticide (EPA File Symbol 45729-E), containing the active ingredients docusate sodium sulfosuccinate (hereafter referred to as dioctyl sodium sulfosuccinate) and undecylenic acid at 12 and 2 percent respectively, active ingredients not included in any currently registered product.

The application was approved on August 8, 1995, as De-Flea Shampoo Concentrate for use to control fleas, ticks, and lice on dogs, cats and other nursing animals (EPA Registration Number 45729-2).

The Agency has considered all required data on risks associated with the proposed use of dioctyl sodium sulfosuccinate and undecylenic acid, and information on social, economic, and environmental benefits to be derived from use. Specifically, the Agency has considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health safety determinations which show that use of dioctyl sodium sulfosuccinate and undecylenic acid when used in accordance with widespread and commonly recognized practice, will not generally cause unreasonable adverse effects to the environment.

In accordance with section 3(c)(2) of FIFRA, a copy of the approved label and the list of data references used to support registration are available for public inspection in the office of the Product Manager. The data and other scientific information used to support registration, except for material specifically protected by section 10 of

FIFRA, are available for public inspection in the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 1132, CM #2, Arlington, VA 22202 (703-305-5805).
