DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Availability of a Draft Recovery Plan for the Madison Cave Isopod for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service announces the availability for public review of a draft Recovery Plan for the Madison Cave Isopod (*Antrolana lira*). The Madison Cave Isopod is a subterranean freshwater crustacean endemic to the Shenandoah Valley in Virginia. The species was listed as threatened in November 1982 due to its extremely limited distribution and threats to the quality of its deep karst habitat. The objective of the proposed Recovery Plan is to protect Madison Cave isopod populations by conserving its groundwater habitat, thereby enabling its removal from the Federal list of endangered and threatened wildlife and plants. To accomplish this, the draft Plan recommends recovery activities that should continue or be initiated. If the Recovery Plan is successfully implemented, full recovery

may be achieved by 2005. The Service solicits review and comment from the public on this draft Plan.

DATES: Comments on the draft Recovery Plan must be received December 18, 1995 to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft Recovery Plan can obtain a copy from the U.S. Fish and Wildlife Service, Chesapeake Bay Field Office, 177 Admiral Cochrane Drive, Annapolis, Maryland 21401, telephone 410/573-4537 and fax 410/269-0832. Comments should be sent to the same address, to the attention of G. Andrew Moser.

FOR FURTHER INFORMATION CONTACT: G. Andrew Moser at 410/573-4537 (see **ADDRESSES**).

SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or threatened animal or plant to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the U.S. Fish and Wildlife Service's endangered species program. To help guide the recovery effort, the Service is working to prepare Recovery Plans for most of the listed species native to the United States. Recovery Plans describe actions considered necessary for conservation of the species, establish criteria for the recovery levels for downlisting or delisting them, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 et seq.) requires the development of Recovery Plans for listed species unless such a Plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice and an opportunity for public review and comment be provided during Recovery Plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised Recovery Plan. The Service and other Federal agencies will also take these comments into account in the course of implementing Recovery Plans.

The document submitted for review is the draft Madison Cave Isopod (*Antrolana lira*) Recovery Plan. The Madison Cave isopod is a subterranean crustacean endemic to the Shenandoah Valley of Virginia. This monotypic genus is the only freshwater member of the family Cirolanidae found north of Texas. Until 1990, *A. lira* was known only from two sites, Madison Saltpetre
