EFFECTIVE DATE: 0901 UTC, November 9, 1995.

FOR FURTHER INFORMATION CONTACT: Scott Speer, System Management Specialist, System Management Branch, AWP-530, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261, telephone (310) 725-6533.

SUPPLEMENTARY INFORMATION:

History

On June 15, 1995, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) by establishing a Class D airspace area at Chandler Municipal Airport, Chandler, AZ. (60 FR 31423). The effect of this action is to provide adequate Class D airspace for aircraft executing an instrument approach procedure at Chandler Municipal Airport.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. Class D airspace designations are published in paragraph 5000 of FAA Order 7400.9C, dated August 17, 1995, and effective September 16, 1995, which is incorporated by reference in 14 CFR 71.1. The Class D airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) establishes a Class D airspace area at Chandler Municipal Airport, AZ. This action will provide adequate Class D airspace for aircraft executing instrument approach procedures at Chandler Municipal Airport, Chandler, AZ.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 10034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a

routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
