SUPPLEMENTARY INFORMATION: The Draft Texas Resources Management Plan (RMP) and Environment Impact Statement (EIS) identifies and analyzes the future options for managing the Federal mineral estate situated within Texas administered by the Bureau of Land Management (BLM), Tulsa District.

The Texas RMP is being prepared using the BLM planning regulations issued under the authority of the Federal Land Policy and Management Act of 1976.

When completed, the RMP will provide a comprehensive framework for managing the Federal minerals within Texas over the next 20 years.

The contents of this Draft RMP/EIS focus on resolving one resource management issue, the leasing and development of Federal oil and gas resources in Texas.

Three RMP alternatives have been developed to describe the different management options available to the BLM for administering Federal oil and gas in Texas. These alternatives were specifically developed to respond to that issue. Each alternative presents a different level of oil and gas leasing stipulation application.

Alternative A. No Action.

This alternative represents a continuation of present resource allocation levels and management practices. This alternative provides a baseline for comparison of other

alternatives, and may not adequately resolve the issues identified in the RMP/EIS.

Alternative B. Intensive Surface Protection (Agency Preferred Alternative).

This represents an alternative which would place primary emphasis on protecting important environmental values through the use of additional leasing stipulations. The goal of this alternative is to change present management direction so that identified surface resource values are considered in the leasing process in a manner that provides additional protection for valuable surface resources.

Alternative C. No Leasing.

This represents an alternative which would remove Federal oil and gas from availability for leasing and development. It would change management direction so that the issue is resolved in a manner that places highest priority on the preservation of the oil and gas resources and protection of the associated surface resources.

Fish and Wildlife Service

Notice of Availability of a Technical/ Agency Draft Recovery Plan for "Stahlia monosperma" for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service announces availability for public review of a technical/agency draft recovery plan for *Stahlia monosperma* (Cobana negra). This species belongs to a monotypic Genus endemic to Puerto Rico and Hispaniola, and it usually grows in brackish, seasonally flooded wetlands in association with mangrove communities. The only wild populations in Puerto Rico are known from Cabo Rojo, Río Grande, and Vieques island. Coastal development threatens the remnant populations of this species. The Service solicits review and comments from the public on this draft plan.

DATES: Comments on the draft recovery plan must be received on or before November 27, 1995 to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy by contacting Mr. Jorge E. Saliva, Caribbean Field Office, P.O. Box 491, Boquerón, Puerto Rico 00622. Comments and materials received are available upon request for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Jorge E. Saliva, Caribbean Field Office, P.O. Box 491, Boquerón, Puerto Rico 00622, Telephone: 809/851-7297.
