

Federally-approved Coastal Zone Management Programs. These States and Territories are required to submit coastal nonpoint programs under § 6217 of the Coastal Zone Act Reauthorization Amendments of 1990 (CZARA), in accordance with the Program Development and Approval Guidance developed by the U.S. Environmental Protection Agency (EPA) and the National Oceanic and Atmospheric Administration (NOAA).

#### Title

Program Development and Approval Guidance for Coastal Nonpoint Pollution Control Programs (CZARA Section 6217). OMB Control Number 2040-0153, expiration date January 31, 1996.

#### Abstract

The Program Development and Approval Guidance implements Section 6217 of the 1990 Coastal Zone Management Act Reauthorization Amendments. The guidance requires 24 coastal States and 5 coastal Territories with approval Coastal Zone Management Programs to submit Coastal Nonpoint Programs to EPA and NOAA for joint review in July 1995. This one-time submittal will be used to determine if States and Territories receiving Clean Water Act Section 319 and Coastal Zone Management Act Section 306 Federal grants will face reductions in fiscal year 1996.

Based on initial reviews of many of the Coastal Nonpoint Programs that have been submitted for review, EPA and NOAA anticipate that many programs are likely to receive conditional approvals. These conditional approvals may require States and Territories to submit additional information at a later date prior to receiving final program approval.

The EPA would like to solicit comments to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information;
- (iii) Enhance the quality, utility, and clarity of the information to be collected; and
- (iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information

technology, e.g., permitting electronic submission of responses.

#### Burden Statement

The original Information Collection Request estimated that the reporting burden to develop coastal nonpoint programs under the Program Development and Approval Guidance would average 1,874 hours per response (29 respondents), including the time for reviewing instruction, searching existing data sources, completing and reviewing the information, and preparing the final report. Because most of the coastal States and Territories have completed a large portion of their program development at this time, EPA estimates that the remaining reporting burden will be approximately 20 percent of the original burden estimate, or appropriately 375 hours per response.

No person is required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are displayed in 40 CFR Part 9.

Send comments regarding these matters, or any other aspect of the information collection, including suggestions for reducing the burden, to the address listed above.

Dated: September 19, 1995.

**SUMMARY:** Notice is hereby given that the State of Kansas is revising its approved State Public Water System Supervision (PWSS) Program. Kansas has adopted regulations for (1) synthetic organic chemicals and inorganic chemicals (Phase II), that correspond to the National Primary Drinking Water Regulations (NPDWR) published by EPA on January 30, 1991 (56 FR 3526); (2) volatile organic chemicals (Phase IIB), that correspond to the NPDWR published by EPA on July 1, 1991 (56 FR 30266); (3) lead and copper, that correspond to the NPDWR published by

EPA on June 7, 1991 (56 FR 26460), and as amended on July 15, 1991 (56 FR 32112) and June 29, 1992 (57 FR 28785); and total coliforms, that correspond to the NPDWR published by EPA on June 10, 1992 (57 FR 24744); and (4) synthetic organic chemicals and inorganic chemicals (Phase V) that correspond to NPDWR published by EPA on July 17, 1992 (57 FR 31776).

EPA has determined that these State program revisions are no less stringent than the corresponding Federal regulations. This determination was based upon an evaluation of Kansas's PWSS program in accordance with the requirements stated in 40 CFR 142.10.
