DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 675

[Docket No. 950206040-5040-01; I.D. 092295A]

Groundfish of the Bering Sea and Aleutian Islands Area; Pollock in the Bering Sea Subarea by the Inshore Component

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is closing the directed fishery for pollock by vessels catching pollock for processing by the inshore component in the Bering Sea subarea (BS) of the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to prevent exceeding the second seasonal allowance of the pollock total allowable catch (TAC) for vessels catching pollock for processing by the inshore component in this area.

EFFECTIVE DATE: 12 noon, Alaska local time (A.l.t.), September 23, 1995, until 12 midnight, A.l.t., December 31, 1995.

FOR FURTHER INFORMATION CONTACT: Mary Furuness, 907-586-7228.

SUPPLEMENTARY INFORMATION: The groundfish fishery in the BSAI exclusive economic zone is managed by NMFS according to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 675.

In accordance with § 675.20(a)(7)(ii), the second seasonal allowance of pollock for the inshore component in the BS was established by the Final 1995 Harvest Specifications of Groundfish (60 FR 8479, February 14, 1995) and augmented from the non-specific operational reserve (60 FR 32278, June 21, 1995) as 237,343 metric tons (mt). The amount actually available is 204,531 mt, subsequent to harvests from the first seasonal allowance.

The Director, Alaska Region, NMFS (Regional Director), has determined in

accordance with § 675.20(a)(8), that the second seasonal allowance of pollock TAC for vessels catching pollock for processing by the inshore component in the BS soon will be reached. Therefore, the Regional Director has established a directed fishing allowance of 203,531 mt with consideration that 1,000 mt will be taken as incidental catch in directed fishing for other species in the BS. Consequently, NMFS is prohibiting directed fishing for pollock by vessels catching pollock for processing by the inshore component in the BS.

Maximum retainable bycatch amounts for applicable gear types may be found in the regulations at § 675.20(h).

Classification

This action is taken under § 675.20 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 22, 1995.

Richard W. Surdi,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.
