BILLING CODE 5000-04-F

Department of the Navy**Record of Decision for the Homeporting of Seawolf Class Submarines on the East Coast of the United States**

Pursuant to section 102(2) of the National Environmental Policy Act (NEPA) of 1969 and the Council on Environmental Quality regulations implementing NEPA procedures (40 CFR 1500-1508), the Department of the Navy announces its decision to homeport the SEAWOLF class submarine at the Naval Submarine Base (SUBASE) New London, Groton, CT and to implement required dredging of the Thames River to provide safe access.

Up to three SEAWOLF class submarines will be homeported at the SUBASE replacing three existing homeported submarines resulting in no net increase in submarine or personnel loading at the SUBASE. Dredging will deepen the access channel from 35 ft to 39 ft below mean low water (MLW) in the Thames River from the Gold Star (I-95 Highway) Bridge to pier 17 at the SUBASE. Dredging will also occur from the channel to piers 8 and 10, which are designated as the SEAWOLF home port piers, and for access to pier 17 (located up-river from piers 8 and 10) to provide for submarine maintenance. Up to three berths at piers 8 and 10 will be deepened to 42 feet below MLW. The entire existing width of the navigation channel will be dredged from the I-95 bridge to the south end of the SUBASE. This area has been determined to contain marine sediments which are suitable for unconfined open water disposal. Dredging of the section of the river where sediments contain elevated levels of contaminants will be minimized by limiting the width of the channel to allow only a one way passage of the SEAWOLF class submarine for this short stretch. This 300 foot width will reduce significantly the volume of contaminated sediment being removed. Disposal of a total of 1.1 million cubic yards (CY) of dredged sediment will be at the New London Disposal Site (NLDS) in Long Island Sound.

In 1991, the Navy issued a draft environmental impact statement addressing a proposal to dredge the Thames River to allow access for the
