## Federal Aviation Administration

### Situational Awareness for Safety Systems Requirements Team Meeting

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of meeting.

**SUMMARY:** The concept of Situational Awareness for Safety (SAS) includes the exchange and use of GPS position, terrain, weather, and other information, effectively displayed to pilots, dispatchers, and controllers, to create an environment promoting more efficient, safe, and free use of airspace. This information exchange and use will contribute to an environment that will facilitate implementation of the emerging free flight concept. SAS is not a capability envisioned exclusively for air carriers, but applies to small general aviation and air taxi as well as large air carrier aircraft. This notice announces a meeting to solicit information from the aviation community concerning flight standards and procedural applications based on advances in human factors, cognitive pilot decision making, computer and display technology, precision navigation, data link, and aviation weather systems. The information is requested to assist the Situational Awareness for Safety Systems Requirements Team (SAS-SRT) in forming the requirements for Basic and Advanced Situational Awareness for Safety Systems. The focus of this government/industry team will be the validation of previously identified "fast track" avionics applications and the identification of FAA activities necessary to enable the implementation and operational use of these technologies.

**DATES:** The meeting will be held on October 26, 1995, from 8:00 a.m. until 5:00 p.m.

**ADDRESSES:** The meeting will be held at the Virginia Center for Innovative Technology, 2214 Rock Hill Road, Herndon, Virginia.

**FOR FURTHER INFORMATION CONTACT:** Mr. Mark Cato, Crown Communications, Inc., 1850 K Street, NW., Suite 1200, Washington, DC 20006; telephone (202) 785-2600, extension 3020.

**SUPPLEMENTARY INFORMATION:** Pursuant to section 10(a)(2) of the Federal

Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. app. II), notice is hereby given of a meeting to solicit information from the aviation community concerning flight standards, and procedural applications based on advances in human factors, cognitive pilot decision making, computer and display technology, precision navigation, data link, and aviation weather systems. The information is requested to assist SAS-SRT in its deliberations with regard to a task assigned to SAS-SRT by the Federal Aviation Administration. Specifically the task is as follows:

Develop guidance, standards, and procedures that will: foster implementation of Situational Awareness for Safety (SAS) Systems; develop standards for the manufacture of equipment, hardware, software, and operational procedures; and coordinate validation of the SAS concept. SAS graphically displays aircraft position, terrain, weather, and other information, to pilots, dispatchers, and controllers. This information exchange will contribute to an environment that will promote an efficient and safe National Airspace System.

Attendance is open to the interested public, but may be limited to the space available. In addition, sign and oral interpretation can be made available at the meeting, as well as an assistive listening device, if requested 10 calendar days before the meeting.

Arrangements may be made by contacting the meeting coordinator listed under the heading **FOR FURTHER INFORMATION CONTACT**.

Issued in Washington, DC, on September 26, 1995.
