Acid Rain Programs**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** Title IV of the Clean Air Act requires EPA to establish the Acid Rain Program to reduce the adverse environmental and public health effects of acidic deposition. Under titles IV and V of the Act, State and local permitting authorities develop and administer acid rain programs as part of their title V operating permits programs. The State and local permitting authorities listed in this notice have submitted acid rain programs for EPA review that have subsequently been determined to be acceptable to the EPA Administrator as part of their title V operating permits programs. This notice is for informational purposes only and does not supplant any other **Federal Register** notices under title V.

**FOR FURTHER INFORMATION CONTACT:** Robert Miller, U.S. EPA, Acid Rain Division (6204J), 401 M St. SW., Washington, DC 20460, (202) 233-9077.

**SUPPLEMENTARY INFORMATION:** In Phase I of the Acid Rain Program (1995 through 1999), EPA issues Phase I acid rain permits and is the permitting authority for certain acid rain affected sources,

most of which are coal burning utilities. In Phase II of the Acid Rain Program (beginning in the year 2000 and continuing into perpetuity), state and local permitting authorities are required under titles IV and V of the Act to act as the permitting authority for acid rain affected sources in Phase II and issue acid rain permits as part of their title V operating permits programs. Acid rain affected sources must submit their initial Phase II acid rain permit applications to the appropriate permitting authority no later than January 1, 1996. Initial acid rain permits must be issued to all acid rain affected sources no later than December 31, 1997.

**Acid Rain Program: Notice of Annual Adjustment Factors for Excess Emissions Penalty**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of annual adjustment factors for excess emissions penalty.

**SUMMARY:** Under the Acid Rain Program, affected units must hold enough allowances to cover their sulfur dioxide emissions and meet an emission limit for nitrogen oxides. Under 40 CFR 77.6,

units that do not meet these requirements must pay a penalty without demand to the Administrator based on the number of excess tons emitted times \$2000 as adjusted by an annual adjustment factor that must be published in the **Federal Register**.

The annual adjustment factor for adjusting the penalty for excess emissions of sulfur dioxide under 40 CFR Part 77 for compliance year 1995 is 1.196. This value is derived from the Consumer Price Index for 1990 and 1995, as defined in 40 CFR 72.2, and corresponds to a penalty of \$2392 per excess ton of sulfur dioxide emitted.

The annual adjustment factor for adjusting the penalty for excess emissions of sulfur dioxide and nitrogen oxides under 40 CFR Part 77 for compliance year 1996 is 1.227. This value is derived from the Consumer Price Index for 1990 and 1996, as defined in 40 CFR Part 72, and corresponds to a penalty of \$2454 per excess ton of sulfur dioxide or nitrogen oxides emitted.

Video dialtone service differs sufficiently from basic telephone service in the other price cap baskets to warrant the creation of its own basket. The tariffs and cost support information accompanying them will be used by the FCC staff to ensure that the tariff rates to be paid for basic video dialtone services are just reasonable, and nondiscriminatory, as Section 201 and 202 of the Communications Act require.
