

information requested. Furthermore, 19 CFR 355.37 of the Department's regulations gives the Department broad discretion in the use of BIA to calculate benefits for non-cooperating companies who do not submit a complete response. Both the GOM and Cinsa were informed of the need to provide the interest rate for the previously unreported loan. In light of the respondent's failure to respond to our request for complete loan information, we are continuing to use a zero interest rate as BIA.

Comment 5: Respondents contend that the Department incorrectly calculated the commercial dollar interest rate benchmark to which all Bancomext loans are compared. The Department's benchmark was calculated using a weighted average of the commercial interest rates of U.S. dollar loans reported in the Federal Reserve Bulletins ranging from \$1,000 to \$999,000. Respondents argue that, because a significant portion of the loans obtained during the period of review were in excess of \$999,000, the Department should include in its calculation of the commercial interest rate benchmark the interest rates for dollar loans valued between \$1 million and \$5 million.

Department's Position: We agree. The Department has recalculated its benchmark for dollar-denominated short-term loans to include the interest rates reported in the Federal Reserve Bulletin on comparably sized loans. In addition, the Department inadvertently used the 1993 benchmark for two short-term loans contracted in 1992. It is the Department's practice to select a benchmark interest rate for loans at the time the terms of the loan are established, which in this case was when the loans were received. (See Rice From Thailand; Final Results of Countervailing Duty Administrative Review (59 FR 8906; February 24, 1994)). Therefore, the Department has recalculated the benefit for the Bancomext loans received in 1992, but on which interest was paid in 1993, using the 1992 benchmark rate instead of the 1993 benchmark rate. Because of these changes, we now determine the benefit conferred by the Bancomext program to be zero for APSA and 0.48 percent *ad valorem* for Cinsa.

Final Results of Review

For the period January 1, 1993 through December 31, 1993, we determine the net subsidy to be 0.42 percent *ad valorem* for all companies. In accordance with 19 CFR 255.7, any rate less than 0.5 percent *ad valorem* is *de minimis*.

The Department intends to instruct the Customs Service to liquidate, without regard to countervailing duties, all shipments of the subject merchandise from Mexico exported on or after January 1, 1993, and on or before December 31, 1993.

The Department will also instruct the U.S. Customs Service to collect a cash deposit of estimated countervailing duties of zero percent of the f.o.b. invoice price on all shipments of the subject merchandise from all companies entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this review.

This notice serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 C.F.R. 355.34(d). Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.22.
