

operations. This may be accomplished through either gravity flow or pumping through either a pipeline or a relocated stream channel.

In order to ensure continued access to lands north of the Continental Mine, the expansion of the Hanover Pit will also require the relocation of County Road 3-5 around mining operations. Surface mining operations currently conducted at the Continental Mine produce approximately 10,000 tons of ore per day from the Continental Pit. Exploratory drilling has indicated that economic ore reserves recoverable by open pit mining techniques occur around the perimeter of the existing Continental Pit. Based on these results, the existing pit is proposed to be expanded. Expansion of the pit will include additional land owned by Cobre, and BLM land, and may also include approximately 7 acres of USFS land.

Cobre also currently conducts underground mining activities at the Continental Mine site. Between 2,000 and 5,000 tons per day of ore are crushed in an underground crushing facility. The crushed ore is transported to the surface and is sent to either the #1 Mill by conveyor or to the #2 Mill stockpile by truck for processing.

Due to the nature and depth of mining activities and the rock stability in the mining area, no subsidence has occurred, and none is expected to occur.

Reclamation of the site will comply with BLM provisions of an approved reclamation plan and plan of operations. It is anticipated that the New Mexico Mining Act regulations will also be instrumental for ultimate closure requirements. The BLM and the USFS will determine "post mining land use" for the portions of the pit areas, the waste rock dumps, and the leach pads located on Federal land.

The objective of the reclamation plan will be to minimize public safety hazards, and to provide for long-term protection of the environment and restoration of the site to a condition consistent with planned long-term land use. Major components of the reclamation plan are anticipated to include: rinsing the leach heaps to remove residual copper-bearing solution; recontouring the top surfaces of the leach heaps and the waste rock dumps; removal of buildings, equipment and foundations; recontouring roads, building sites and other disturbed areas; protection of natural stream channels and permanent diversion ditches at strategic points to ensure long-term stability; and blocking access to the open pits. An evaluation of the stability of proposed slopes of the

reclaimed open pit, waste rock dump slopes, and heap leach slopes will be performed. After initial dewatering and drying, the tailings will be re-contoured and capped.

The EIS will address the resources of geology and minerals, soils, water resources, vegetation, wildlife, range management, air quality, visual resources, reclamation, land use, access, recreation, wilderness, cultural resources, social and economic values, transportation and noise. The BLM has identified the following potentially significant impacts as requiring additional analysis: quality of post-mining surface and ground water generated by the Continental and Hanover open pits; potential impacts to surface and ground water from acid mine drainage from the mine's waste rock dumps; potential impacts to ground water from the mine's tailings impoundment; potential impacts of the diversion of Hanover Creek; potential impacts of the re-routing of County Road 3-5.

Because these issues were determined to require special investigation, it is anticipated that the majority of work for other resources will be limited to summarizing and incorporating by reference data and analyses from existing environmental studies as prescribed in 40 CFR § 1500.4 and § 1500.5. Additional investigation may be indicated for other resources after review of existing data and comments received during the scoping process.

BLM's scoping process for the EIS will include: (1) identification of issues to be addressed; (2) identification of viable alternatives; and (3) notifying interested groups, individuals, and agencies so that additional information concerning these issues can be obtained. The scoping will consist of a news release announcing the start of the EIS process; letters of invitation to participate in the scoping process; and a scoping document which further clarifies the proposed action and significant issues being considered to be distributed to those on the mailing list and available upon request.

#### National Register of Historic Places; Notification of Pending Nominations

Nominations for the following properties being considered for listing

in the National Register were received by the National Park Service before October 14, 1995. Pursuant to section 60.13 of 36 CFR Part 60 written comments concerning the significance of these properties under the National Register criteria for evaluation may be forwarded to the National Register, National Park Service, P.O. Box 37127, Washington, D.C. 20013-7127. Written comments should be submitted by November 8, 1995.

Carol D. Shull,

BILLING CODE 4310-70-P

**Notice of Inventory Completion of Native American Human Remains in the Possession of the Colorado Historical Society, Denver, CO**

AGENCY: National Park Service, Interior  
ACTION: Notice

Notice is hereby given in accordance with provisions of the Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003(d), of the completion of an inventory of human remains in the possession of the Colorado Historical Society, Denver, CO.

The inventory and assessment of these human remains has been made by the Colorado Historical Society staff and representatives of the Pawnee Tribe of Oklahoma.

The human remain consists of one human scalplock. No known individual was identified. The scalplock was acquired in 1881 by John B. Hamilton at Pawhuska, Oklahoma as part of a collection associated with an Osage tribal leader, Black Dog, and identified in the extant documentation as the scalplock of a Pawnee. The scalplock was subsequently acquired by Dr. and Mrs. S. Julian Lamme and loaned to the Colorado Historical Society in 1944. Part of the scalplock was turned over by the Lammes in March 1957 to Kohlberg's, a Denver antique dealer, for sale. In April 1957, a portion of this item was discovered in the Colorado Historical Society collections and purchased from the heirs of Dr. and Mrs. S. Julian Lamme.

Based on the above mentioned information, consultations with the Pawnee Tribe, and the history of conflict between the Osage and the Pawnee during the 19th century (including Black Dog's lifetime), officials of the Colorado Historical Society have determined that, pursuant to 25 U.S.C 3001 (2), there is a relationship of shared group identity which can be reasonably traced between these human remains and the Pawnee Tribe of Oklahoma.

This notice has been sent to officials of the Pawnee Tribe of Oklahoma. Representatives of any other Indian tribe which believes itself to be culturally affiliated with these human remains should contact Anne Wainstein Bond, Curator of Material Culture, Colorado Historical Society, 1300 Broadway, Denver, CO 80203, phone (303) 866-4691 before November 24, 1995. Repatriation of these remains may begin after this date if no additional claimants come forward.

Dated: October 18, 1995
