

updated information on the discharge to determine whether the 301(h) criteria are still being met and whether the 301(h) variance should be reissued. Under 40 CFR 125.59(f), each 301(h) permittee is required to submit an application for a new section 301(h) modified permit within 180 days of the existing permit's expiration date; 40 CFR Part 125.59(c) lists the information required for a modified permit. Section 125.59(e) requires additional information to show compliance with applicable pretreatment requirements under § 125.65, and primary or equivalent treatment requirements under § 125.60. The information that EPA needs to determine whether the POTW's reapplication meets the section 301(h) criteria previously listed is outlined in the questionnaire attached to 40 CFR Part 125, Subpart G. The questionnaire is similar to the two used by POTWs for their original applications.

The EPA would like to solicit comments to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information;
- (iii) Enhance the quality, utility, and clarity of the information to be collected; and
- (iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
