

Storm Petrels: Wilson's Storm Petrel (*Oceanites oceanicus*) and Black-bellied Storm Petrel (*Fregetta tropica*).  
 Cormorants: Blue-eyed Shag (*Phalacrocorax atriceps*).  
 Sheathbills: Greater Sheathbill (*Chionis alba*)  
 Skuas: South Polar Skua (*Catharacta maccormicki*), and Brown Skua (*C. lonnbergi*).  
 Gulls and Terns: Kelp Gull (*Larus dominicanus*), and Antarctic Tern (*Sterna vittata*).

*Location*

Palmer Station vicinity and nearby islands accessible by zodiac.

*Dates*

October 1, 1995-May 31, 1998

3. Applicant, Rennie S. Holt, U.S. AMLR Program, Southwest Fisheries Science Center, National Marine Fisheries Service, 8604 La Jolla Shores Drive, La Jolla, California 92038, Permit Application No. 96-025

*Activity for Which Permit is Requested*

Taking. The applicant proposes to continue collection of data on seabirds, in accordance with CCAMLR Protocols, that was begun at Seal Island in 1986. A census of up to 15,000 birds from each of the following species will be conducted: Chinstrap penguins, Macaroni penguins and Cape Petrels. In addition, the applicant will capture and release up to 500 Chinstrap and Macaroni penguins each for purposes of measuring, weighing and examining to gather data on seabird abundance and growth to compare with data collected during previous years.

*Location*

South Shetland Islands and Antarctic Peninsula region.

*Dates*

January 1, 1996-April 1, 2001

4. Applicant, Rennie S. Holt, U.S. AMLR Program, Southwest Fisheries Science Center, National Marine Fisheries Service, 8604 La Jolla Shores Drive, La Jolla, California 92038, Permit Application No. 96-026

*Activity for Which Permit is Requested*

Taking and Enter Sites of Special Scientific Interest. The applicant proposes to enter Byers Peninsula (SSSI #6) and Cape Shirreff (SSSI #32) to study pinnipeds and seabirds. A comprehensive census of these populations has been conducted periodically and repeat censuses are needed. At both sites, care will be taken to minimize disturbance to terrestrial habitats and lifeforms. All activities to

be conducted would comply with the approved SSSI management plans enforce for each area.

The pinniped research to be conducted consists of ship-supported and land-based studies in the region of the Antarctic Peninsula. The U.S. AMLR Program will conduct a census of seals at various sites in preparation of selecting a new study site. In following years, the AMLR land-based site at Seal Island will be relocated to a suitable site.

The Seal Island study site will be occupied on a limited basis. Up to 1,000 Fur seal pups will be weighed and released. These data will be compared with previous data to examine the population dynamics of Antarctic Fur seals. Obtaining information on the status of seals at the present time is particularly important in light of the potential development that is being considered for antarctic marine resources.

*Location*

SSSI #6-Byers Peninsula, Livingston Island, South Shetland Islands; and SSSI #32-Cape Shirreff, Livingston Island, South Shetland Islands.

*Dates*

January 1, 1996-April 1, 2001.

Nadene G. Kennedy,

Permit Office, Office of Polar Programs.

BILLING CODE 7555-01-M

**Notice of Permit Application Received Under the Antarctic Conservation Act of 1978**

**AGENCY:** National Science Foundation.

**ACTION:** Notice of permit application received under the Antarctic Conservation Act.

**SUMMARY:** Notice is hereby given that the National Science Foundation (NSF) has received a waste management permit application for operation of a small research camp on Seal Island, South Shetland Islands, Antarctica by Dr. Rennie S. Holt, a citizen of the United States. The application is submitted to NSF pursuant to regulations issued under the Antarctic Conservation Act of 1978.

**DATES:** Interested parties are invited to submit written data, comments, or views with respect to this permit application on or before November 27, 1995. Permit applications may be inspected by interested parties at the Permit Office, address below.

**ADDRESSES:** Comments should be addressed to Permit Office, Room 755,

Office of Polar Programs, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230.

**FOR FURTHER INFORMATION CONTACT:**

Robert S. Cunningham or Nadene Kennedy at the above address or (703) 306-1033.

**SUPPLEMENTARY INFORMATION:** NSF's Antarctic Waste Regulation, 45 CFR Part 671, requires all U.S. citizens and entities to obtain a permit for the use or release of a designated pollutant in Antarctica, and for the release of waste in Antarctica. NSF has received a permit application under this Regulation for the operation of an austral summer research camp by four to six scientists for up to 90 days per season over the next five field seasons from December 1995 to mid-March 2001. Use of the camp for the 1995-1996 field season is estimated to be 20 days. The camp consists of a main living quarters (a weatherport tent which will remain unused this season and removed from the camp site), a small lab/storage shed, a storage shed, and an outdoor toilet. Three small blinds, suitable for observing wildlife, are located on the island. The permit applicant is: Dr. Rennie S. Holt, Chief Scientist, U.S. AMLR Program, Southwest Fisheries Science Center, National Marine Fisheries Service, 8604 La Jolla Shore Dr., La Jolla, CA 92038.

During the field season, the camp main buildings, which have existed for several years, are to be removed in one or more field seasons. It is estimated that approximately 950 liters (250 gallons) of kerosene and 215 liters (83 gallons) of gasoline would be burned in an average use season at the site of the camp. In addition, sanitary wastes, wastewater, and minor quantities of research equipment (approximately 250 tags, 2,300 seabird bands, 90 small radio transmitters, less than five time-depth recorders, and less than 2.2 kg (4.8 pounds) of paint and dye markers) are to be released to the environment incidental to scientific investigations during a field season. The permit would remain in effect until the conclusion of investigations or until mid-March 2001, whichever occurs first. The activity is categorically excluded from environmental review documentation per NSF environmental assessment procedures at 45 CFR 641.16(c).

Robert S. Cunningham,

Environmental Compliance Manager,  
 National Science Foundation.
