Title: Effectiveness of a Community's Implementation of the NFIP: Community Assistance Contact Report and Community Assistance Visit Report.

Abstract: FEMA's National Flood Insurance Program (NFIP) Community Assistance Program (CAP) is designed to assure that communities participating in the NFIP are achieving the flood loss reduction objectives of the program. The CAP also provides needed floodplain management assistance services to NFIP communities to identify, prevent, and resolve floodplain management issues before they develop into problems requiring enforcement actions.

Two methods are used to obtain information from local participating communities to determine community assistance needs: Community Assistance Contacts and Community Assistance Visits. The Community Assistance Contact (FEMA Form 81-69) is a telephone contact or brief visit with a NFIP community to determine if program-related problems exist and to offer assistance.

The Community Assistance Visit (FEMA Form 81-68) is a scheduled visit to a NFIP community for the purpose of conducting a comprehensive assessment of the community's floodplain management program and to assist the community in understanding the NFIP and its requirements and implementing effective flood loss reduction measures.

The forms are used to document contacts, visits, and discussions with community officials.
