NorAm states that all ground disturbance will occur within the fenced graveled lot, where the compressor is located, which exists on previously disturbed land and right-of-way. NorAm states that the building and yard piping to the compressor will be removed and the concrete foundation will remain in place. NorAm notes that upon retiring the facilities, it will revegetate any disturbed rights-of-way and will monitor the area involved to insure adequate sprouting and coverage. Further, NorAm claims that it will use its existing erosion control program originally filed with the Commission in Docket No. CP87-544-000 to insure complete revegetation and stability of the soils affected by the proposed abandonment.

Any person desiring to be heard or to make any protest with reference to said application should on or before November 21, 1995, file with the Federal Energy Regulatory Commission (888 First Street, N.E., Washington, D.C. 20426) a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.
