

cost-share agreements under Section 502 of the Act.

The BLM has continued the use of regulations in 43 CFR Subpart 2812 on an interim basis pending the preparation and publication of new cost-share regulations. Since the regulations contained in this subpart clearly represent a cost-share road agreement concept, it is proposed by the Secretary that these regulations be revised as necessary and adopted pursuant to the authority contained in Section 310 of FLPMA (43 U.S.C. 1740) for the purpose of implementing Section 502. Continuing the use of pre-existing regulations with only minor modifications and changes would provide for the orderly and continuous administration of all outstanding permits and agreements issued prior to the effective date of this rulemaking.

Applicants for permits to utilize logging roads on Federal land will be required to provide the following—

(a) Identifying information, including name; address; partnership agreement (for partnerships); and articles of incorporation, certificate of authority to do business in Oregon, and copy of bylaws (for corporations);

(b) Description of BLM lands or roads to be used and estimated period of use;

(c) Description of all lands or roads owned or controlled by the applicant that will be served by the right-of-way permit, including an estimate of timber or other materials that will be hauled on each portion;

(d) A map showing all roads to be used which are directly or indirectly controlled by the applicant;

(e) Description of any road construction that will be required on BLM lands;

(f) Description of any proposed improvements to BLM roads; and

(g) Whether any hazardous substances or solid waste will be transported within the right-of-way.

The information collected will allow BLM to determine the applicant's eligibility for a road use permit and whether it is in the Government's interest to enter into a reciprocal agreement with the applicant. A reciprocal agreement would require the applicant to grant BLM access across the applicant's roads, rights-of way or lands. The information is mandatory to obtain a benefit, use of BLM roads, rights-of-way and lands for access to timber.

The public reporting burden for this collection of information is estimated to average one hour per application. The respondents are individuals, partnerships, and corporations engaged in the logging business who desire access to timber across BLM lands. The

estimated number of respondents is 200 per year. The estimated number of responses per respondent is one per year. The estimated total annual burden on respondents is 200 hours.

All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will also become a matter of public record.
