### **NUCLEAR REGULATORY COMMISSION**

[Docket No. 50-298]

#### **Nebraska Public Power District**

#### **Cooper Nuclear Station; Environmental Assessment and Finding of No Significant Impact**

The U.S. Nuclear Regulatory Commission (the Commission) is considering the issuance of an exemption from certain requirements of its regulations to Facility Operating License Number DPR-46. This license was issued to the Nebraska Public Power District (the licensee) for operation of the Cooper Nuclear Station (CNS) located in Nemaha County, Nebraska.

#### **Environmental Assessment**

##### *Identification of the Proposed Action*

The proposed exemption would allow the licensee to reschedule the licensed operator requalification examinations at CNS until after the current refueling outage. The requested exemption would extend the completion date for the examinations from December 22, 1995, until March 15, 1996. In the letter, the licensee indicated that licensed operators will continue to participate in the ongoing requalification training program, and that by assigning licensed operators to the outage organization, a reduction in overall shutdown risk could be realized.

The proposed action is in accordance with the licensee's application dated October 16, 1995, for an exemption from the requirements of 10 CFR 55.59.

##### *The Need for the Proposed Action*

The scheduler exemption requested would extend the completion date for the administration of licensed operator examinations for the CNS requalification program from December 22, 1995, to March 15, 1996. This would move the examination period outside the current refueling outage, thereby allowing the assignment of licensed operators to refueling outage organization positions. The increased oversight of outage activities provided by the licensed operators would result in better shutdown risk management and provide a net benefit with regard to plant safety.

##### *Environmental Impacts of the Proposed Action*

The Commission has completed its evaluation of the licensee's request. The proposed exemption does not change the requirements for licensed operator training, as licensed operators at CNS will continue to participate in the ongoing requalification training program throughout the extension period. The affected licensed operators will continue to demonstrate and possess the required levels of knowledge, skills, and abilities needed to safely operate the plant. The proposed exemption would not change the existing CNS safety limits, safety settings, power operations, or effluent limits. The proposed exemption would allow increased oversight by licensed operators of outage activities with a resulting net benefit to safety.

The change will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable
