##### I. Abstract

The Census Bureau plans to conduct a survey of environmental products and services. This data collection will provide a benchmark for measuring shipments of goods and the revenues for services that define an environmental industry. The survey forms will collect data on the value of products and services provided in 1995 for measuring, preventing, limiting or correcting environmental damage. The survey will also collect value of shipments and services which were exported. The survey results will be used to determine potential product and service classifications in the 1997 Economic Censuses. The survey results will also be used for monitoring and promoting the growth of the environmental industry.

##### II. Method of Collection

The Census Bureau will use mail out/mail back survey forms to collect the data. Companies will be asked to respond to the survey within 30 days of the initial mailing. Letters encouraging participation will be mailed to companies that have not responded by the designated time.
