(4) Is likely to raise novel or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

This action raises the issue of delisting an area source category from the section 112 list of categories and sources and is therefore subject to OMB review.

C. Paperwork Reduction Act

This action does not contain any information collection requirements subject to OMB review under the Paperwork Reduction Act, 55 U.S.C. 3501 et seq.

D. Regulatory Flexibility Act Compliance

Pursuant to 5 U.S.C. 605(6), I hereby certify that this action will not have a significant economic impact on a substantial number of small entities because it imposes no new requirements.

E. Unfunded Mandates Reform Act Compliance

As shown in the Information Collection Request Document (ICR), this action imposes no costs on State, local and tribal governments. Accordingly, the EPA estimates that there is no direct cost to the private sector in any one year, and no total marginal costs to industry under this action in any one year. Therefore, the Agency concludes that it is not required by Section 202 of the Unfunded Mandates Reform Act of 1995 to provide a written statement to accompany this action because promulgation of the action would not result in any expenditure by State, local, and tribal governments, in the aggregate or by the private sector, in any one year.

SUPPLEMENTARY INFORMATION: This draft proposed for Agency-wide ecological risk assessment guidelines is the culmination of a broad-based effort by EPA's Risk Assessment Forum. Since initiating the guidelines development process in 1989, the Risk Assessment Forum has sponsored numerous colloquia and workshops to discuss concepts and peer review documents related to ecological risk assessment. Products of these efforts include the widely-used report *Framework for Ecological Risk Assessment* (Framework Report; EPA/630/R-92/001), two sets of ecological assessment case studies, and a report containing nine ecological risk assessment issue papers. The draft proposed guidelines expand upon and replace the Framework Report and draw extensively from the case studies and issue papers.

The guidelines workshop is the next step in a process that has emphasized peer review and consensus-building. After the workshop, the guidelines will be given additional evaluation by EPA and the EPA Science Advisory Board. Following revision, the proposed guidelines will be published in the Federal Register for public comment. The goal of the guidelines is to improve

the quality and Agency-wide consistency of EPA's ecological risk assessments.
