SUMMARY: This document extends the time-limited tolerance for combined residues of the insecticide/nematicide terbufos and its cholinesterase-inhibiting metabolites in or on the raw agricultural commodity (RAC) green coffee beans for an additional 2 years. American Cyanamid Co. submitted a petition under the Federal Food, Drug and Cosmetic Act (FFDCA) requesting the regulation to establish a maximum permissible level for combined residues of the insecticide/nematicide in or on the commodity.

EFFECTIVE DATE: This regulation becomes effective December 13, 1995.

SUPPLEMENTARY INFORMATION: In the Federal Register of August 2, 1995 (60 FR 39299), EPA issued a proposed rule (FRL-4963-5) that gave notice that the American Cyanamid Co. had submitted data and a request under the FFDCA that a time-limited tolerance for residues of the insecticide/nematicide terbufos on coffee beans be changed to permanent status. The Agency proposed an extension of the time-limited tolerance to allow it to complete its in-depth reassessment of the current established tolerances for terbufos.

The following comments were received from the petitioner, American Cyanamid.

1. American Cyanamid believes that since the acceptance of the new rat metabolism study fulfills the condition of the time-limited coffee bean tolerance, it is sufficient to establish the regulation as permanent, regardless of any on-going analysis of tolerances for reregistration purposes.

2. Additionally, American Cyanamid believes that "the toxicological endpoint of a no-observable-effect level (NOEL) based upon plasma cholinesterase (ChE) inhibition, as mentioned in the proposed rule, is of equivocal value when used in risk assessments" and that "A NOEL based upon alternative tox endpoints such as red blood cell ChE inhibition, brain ChE inhibition, or clinical signs would be

more appropriately used to establish reference dose for regulatory purposes."

American Cyanamid has requested a reevaluation of plasma cholinesterase as a suitable endpoint.

The Agency acknowledges that the condition upon which the initial time-limited tolerance was based, i.e., the lack of an acceptable guideline rat metabolism study, has now been fulfilled.

However, as described in the proposed rule referenced above, the Agency currently has concern over the potential acute dietary risk posed by the current established tolerances based on the estimated margins of exposure (MOE). In light of this concern, the Agency believes that it is prudent to limit the period of time in which the coffee bean tolerance is in effect pending the Agency reassessment of the tolerances.

The Agency will take American Cyanamid's comments relative to the toxicological endpoint into consideration in its reassessment of the established tolerances.

There were no requests for referral to an advisory committee received in response to the proposed rule.

The data submitted with the proposal and other relevant material have been evaluated and discussed in the proposed rule. Based on the data and information considered, the Agency concludes that the time-limited tolerance will protect the public health. Therefore, the time-limited tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the Federal Register, file written objections and/or request a hearing with the Hearing Clerk, at the address given above (40 CFR 178.20). A copy of the objections and/or hearing requests filed with the Hearing Clerk should be submitted to the OPP docket for this rulemaking. The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objections (40 CFR 178.25). Each objection must be accompanied by the fee prescribed by 40 CFR 180.33(i). If a hearing is requested, the objections must include a statement of the factual issue(s) on which a hearing is requested, the requestor's contentions on such issues, and a summary of any evidence relied upon by the objector (40 CFR 178.27). A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the

requestor would, if established, resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested (40 CFR 178.32).

A record has been established for this rulemaking under docket number [PP 8E3574/R2165] (including any objections and hearing requests submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Room 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Written objections and hearing requests, identified by the document control number [PP 8E3574/R2165], may be submitted to the Hearing Clerk (1900), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, DC 20460.

A copy of electronic objections and hearing requests filed with the Hearing Clerk can be sent directly to EPA at: opp-Docket@epamail.epa.gov

A copy of electronic objections and hearing requests filed with the Hearing Clerk must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this rulemaking, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer any objections and hearing requests received electronically into printed, paper form as they are received and will place the paper copies in the official rulemaking record which will also include all objections and hearing requests submitted directly in writing. The official rulemaking record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

Under Executive Order 12866 (58 FR 51735, Oct. 4, 1993), the Agency must determine whether the regulatory action is "significant" and therefore subject to review by the Office of Management and Budget (OMB) and the requirements of the Executive Order. Under section 3(f), the order defines a "significant regulatory action" as an action that is likely to result in a rule (1) having an

annual effect on the economy of \$100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities (also referred to as "economically significant"); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order.

Pursuant to the terms of the Executive Order, EPA has determined that this rule is not "significant" and is therefore not subject to OMB review.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).
