SUPPLEMENTARY INFORMATION:

I. Abstract

The purpose of this survey is to study the public's attitudes regarding: 1) the Census Bureau's planned use of administrative records in the 2000 census and 2) a proposal to collect social security numbers for each household member in the decennial census. In the design for the 2000 census, the Census Bureau plans to expand the use of administrative records to estimate characteristics of nonresponding households, supplement missing data for respondents that return incomplete forms, and estimate the number of persons missed within households. Collection of social security numbers would assist efforts to accurately match administrative records information. This research, in

conjunction with results from an earlier survey, will enable the Census Bureau to assess the public's attitudes.

I. Method of Collection

Telephone interviews will be conducted using an automated survey instrument and a random digit dialing sampling design.

III. Data

OMB Number: Not available.

Form Numbers: The automated survey instrument will not have a form number.

Type of Review: Regular submission.

Affected Public: Individuals and households.

Estimated Number of Respondents: 1,200.

Estimated Time Per Response: 15 minutes.

Estimated Total Annual Burden Hours: 300.
