Prospective Grant of Exclusive Patent License; Pasadena Scientific Industries

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice of prospective grant of exclusive patent license.

SUMMARY: This is a notice in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i) that the National Institute of Standards and Technology ("NIST"), U.S. Department of Commerce, is contemplating the grant of a field of use exclusive license in the United States to practice the invention embodied in U.S. Patent Number 5,389,523, titled, "Liposome Immunoanalysis By Flow Injection Assay" to Pasadena Scientific Industries, having a place of business in Hanover, Maryland.

FOR FURTHER INFORMATION CONTACT: Bruce E. Mattson, National Institute of Standards and Technology, Technology Development and Small Business Program, Building 221, Room B-256, Gaithersburg, MD 20899.

SUPPLEMENTARY INFORMATION: The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within sixty days from the date of this published Notice, NIST receives written evidence and argument which establish that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

U.S. Patent Number 5,389,523 is a method of immunoanalysis which combines immobilized immunochemistry with the technique of flow injection analysis, and employs microscopic spherical structures called liposomes, or lipid vesicles, as carriers of detectable reagents.

NIST may enter into a Cooperative Research and Development Agreement ("CRADA") to perform further research

on the invention for purposes of commercialization. The CRADA may be conducted by NIST without any additional charge to any party that licenses the patent. NIST may grant the licensee an option to negotiate for royalty-free exclusive licenses to any jointly owned inventions which arise from the CRADA as well as an option to negotiate for exclusive royalty-bearing licenses for NIST employee inventions which arise from the CRADA.

The availability of the invention for licensing was published in the Federal Register, Vol. 57, No. 226 (November 23, 1992). A copy of the patent application may be obtained from NIST at the foregoing address.

Dated: December 14, 1995.

BILLING CODE 5000–04–M

Department of the Army

Notice of Availability

AGENCY: Department of the Army, DOD.
ACTION: Notice of availability.

SUMMARY: This announces the Notice of Availability of the Revised Draft Environmental Impact Statement (DEIS) on the construction and operation of the proposed chemical agent demilitarization facility at the Umatilla Depot Activity, Oregon. The proposed facility will be used to demilitarize all stockpiled chemical agents and munitions currently stored at the Umatilla Depot Activity. The revised DEIS examines the potential impacts of on-site incineration, alternative sites within Umatilla Depot Activity and the “no action” alternative. The “no action” alternative is considered to be a deferral

of demilitarization with continued storage of agents and munitions at the Umatilla Depot Activity.

SUPPLEMENTARY INFORMATION: In its Record of Decision (53 FR 5816, February 26, 1988) for the Final Programmatic Environmental Impact Statement on the Chemical Stockpile Disposal Program (CSDP), the Department of the Army selected on-site disposal by incineration at all eight chemical munition storage sites within the continental United States as the method by which it will destroy its lethal chemical stockpile. On February 6, 1989, the Department of the Army published a Notice of Intent (54 FR 5646) which announced that, pursuant to the National Environmental Policy Act and implementing regulations, it would prepare a draft site-specific EIS for the Umatilla chemical munitions disposal facility. The Department of the Army prepared a Draft EIS to assess the site-specific health and environmental impacts of on-site incineration of chemical agents and munitions stored at the Umatilla Depot Activity. A Notice of Availability was published on October 23, 1991 (56 FR 54841) which provided notice that the Draft EIS was available for public comment. In late 1991, preparation of draft and final EIS’s was halted pending the outcome of a National Research Council (NRC) study of alternative technologies for the destruction of chemical agents and munitions and the Army’s review of that study. The alternative technology studies by both the NRC and the Army have been completed and preparation of EIS’s has been restarted. Comments from the initial DEIS were included in this revised draft document.

Comments on this revised DEIS will be considered in the Final EIS and should be provided in writing by February 16, 1996, to the following address: Program Manager for Chemical Demilitarization, ATTN: SFAE–CD–ME, Aberdeen Proving Ground, Maryland 21010–5401. Copies may be obtained by writing to the above address.

ADDITIONAL INFORMATION: The Environmental Protection Agency (EPA) will also publish a Notice of Availability for the revised DEIS in the Federal Register.

FOR FURTHER INFORMATION CONTACT: Above address, or Ms. Suzanne Fournier at (410) 671–1093.

Raymond J. Fatz,

Acting Deputy Assistant Secretary of the Army, (Environment, Safety and Occupational Health), OASA (I, L&E).
