

emergency preparedness exercise which had been scheduled for November 1995.

This schedular exemption is requested by the licensee since the Federal Emergency Management Agency (FEMA) and the States had to cancel their evaluation and participation in the offsite portion of the exercise conducted on November 14, 1995. This request resulted from the impasse relative to passage of the Federal budget that caused a shutdown of FEMA and lack of funding for some State appropriations.

The licensee provided the following basis for supporting the requested schedular exemption:

OPPD, along with the States of Nebraska and Iowa, as well as local officials and volunteer agencies, were fully prepared to conduct a biennial full-scale emergency exercise for the Fort Calhoun Station (FCS) on November 14, 1995. The onsite and offsite objectives and scenario were approved respectively by NRC and FEMA. This exercise was designed to satisfy the requirements of 10 CFR 50, Appendix E, Section IV.F.2.c. The last biennial exercise was conducted on June 29–30, 1993.

In the weeks prior to the exercise, FEMA was unsure whether it could support the exercise as the result of the Federal budget impasse. Some State of Nebraska personnel were also affected by the budget crisis in that some State positions are federally funded. The licensee satisfactorily conducted the onsite portion of the exercise in the absence of full participation by the States and evaluation by FEMA. There were no identified exercise weaknesses associated with the onsite portion of the exercise.

Based upon a review of the licensee's request for a schedular exemption from the requirements of 10 CFR 50, Appendix E, Section IV.F.2.c, the staff finds that the exemption would provide only temporary relief from the applicable regulations.

#### IV

Accordingly, the Commission has determined pursuant to 10 CFR 50.12, this exemption is authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest. The Commission further determines that special circumstances described by 10 CFR 50.12(a)(2)(v) exist in that granting the exemption would provide only temporary relief from the applicable regulations and the licensee has made good faith efforts to comply with the regulations.

Therefore, the Commission hereby grants Omaha Public Power District an exemption from the requirements of 10 CFR 50, Appendix E, Section IV.F.2.c.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will have no significant impact on the quality of the human environment (60 FR 66995).

Dated at Rockville, Maryland, this 28th day of December 1995.

This exemption is effective upon issuance.

#### [Docket Nos. 50-352 and 50-353]

#### Philadelphia Electric Company; Correction

The December 6, 1995, Federal Register contained a "Notice of Issuance of Amendment to Facility Operating Licenses," for the Limerick Generating Station, Units 1 and 2. This notice corrects the notice published in the Federal Register on December 6, 1995, (60 FR 62500). The "Amendment Nos." Section should read "105 and 69."

Dated at Rockville, Maryland, this 27th day of December 1995.

#### [Docket No. 72-14 (50-346)]

#### Toledo Edison Co., Davis-Besse Nuclear Power Station, Independent Spent Fuel, Storage Installation; Exemption

#### I

Toledo Edison Company (the licensee), under the general license in Part 72, Subpart K, is authorized to receive and store spent fuel from its Davis-Besse Nuclear Power Station at an independent spent fuel storage installation (ISFSI) located on the Davis-Besse Nuclear Power Station site. This facility is located at the licensee's site in Oak Harbor, Ohio.

#### II

Pursuant to 10 CFR 72.7, the Nuclear Regulatory Commission (NRC) may grant exemptions from the requirements

of the regulations in 10 CFR Part 72 as it determines are authorized by law, will not endanger life or property or the common defense and security, and are otherwise in the public interest.

Section 72.82(e) of 10 CFR Part 72 requires each licensee to provide a report of preoperational test acceptance criteria and test results to the appropriate NRC Regional Office with a copy to the Director, Office of Nuclear Material Safety and Safeguards, at least 30 days prior to receipt of spent fuel or high-level radioactive waste for storage in an ISFSI. The purpose of the 30-day waiting period is to allow the NRC an opportunity to review test results prior to initial operation of the ISFSI. If an exemption from the requirement of 10 CFR 72.82(e) for a 30-day waiting period was granted, the licensee still would be required to submit the necessary report; however, the licensee could thereafter start loading the first cask before the end of the 30-day period.

#### III

By letter dated September 22, 1995, the licensee requested a schedular exemption pursuant to 10 CFR 72.7 from the requirement of 10 CFR 72.82(e). The licensee committed to submit its report no less than 3 days prior to receipt of spent fuel at its ISFSI. The licensee's exemption request to reduce the 30-day waiting period to 3 days was based on the licensee's need to assure the availability of adequate storage space in Davis-Besse's spent fuel pool to support a refueling outage scheduled to begin in April 1996. To meet that schedule, spent fuel must be removed from the pool and loaded into the dry storage casks at the Davis-Besse plant for transport to the ISFSI prior to receipt of new fuel in February 1996. Because moving and loading the canisters into the horizontal storage modules occurs outside the auxiliary building, and because conducting such activities during inclement weather would complicate these activities, the licensee had planned to begin loading activities in October 1995. Delays, however, have forced the licensee to postpone its schedule. Nonetheless, the need for and underlying basis of the licensee's exemption requests remains. Granting the requested exemption from the 30-day waiting period in 10 CFR 72.82(e) would assist the licensee in assuring it has sufficient time to complete loading operations for dry cask storage before the end of January 1996 while, to the extent possible, minimizing the need to conduct fuel handling activities during inclement weather. Moreover, as noted below, the NRC has completed review of the

licensee's preoperational test report and therefore does not need the full 30 days contemplated by 10 CFR 72.82(e).

In a letter dated December 18, 1995, the licensee reiterated the need for the requested exemption and provided additional information on current circumstances supporting NRC approval. The December 18 letter (and additional information in it) are not necessary to a favorable consideration of the exemption request by NRC. However, the letter confirms the propriety of an exemption.

The NRC conducted an inspection related to the manufacture of the storage canisters at the vendor's fabrication site, and on July 7, 1995, issued a Confirmatory Action Letter to the vendor. The vendor responded to the Confirmatory Action Letter on September 5, 20, 22, and October 2 and 3, 1995. In a letter dated October 12, 1995, NRC found the vendor's responses acceptable. NRC was able to resolve the inspection issues based on the additional information provided by the vendor which included documentation of design changes and associated safety evaluations, engineering analysis regarding the minimum required canister wall thickness, the results of measurements of the actual wall thickness of the canisters, and detailed information on leak testing performed. NRC verified the adequacy of the additional information provided by the vendor and the safety of the canisters and the transfer cask by performing detailed reviews, engineering evaluations, and inspections.

Since receipt of the first canisters on site, NRC has observed selected portions of the preoperational testing activities and has reviewed associated test procedures and results. The licensee submitted the report of preoperational test acceptance criteria and test results required by 10 CFR 72.82(e) to NRC Region III on December 14, 1995. The preoperational tests conducted by the licensee included, among other things, the actual exercise of the licensee's written procedures for loading and unloading the storage canisters. The licensee reviewed the results of these tests, made changes and subsequently approved the canister loading and unloading procedures. The NRC observed licensee's validation of the acceptability of these procedures and is satisfied with the results.

#### IV

Based on the aforementioned oversight and inspection of the preoperational testing activities at the Davis-Besse ISFSI, as well as the NRC's review of the licensee's report of

preoperational test criteria and results, the NRC finds that Toledo Edison has satisfactorily addressed all of the safety issues associated with cask loading, handling, and storage. The results of these NRC activities confirm there is adequate assurance that the cask can perform its intended safety functions and that Toledo Edison has the necessary equipment and procedures in place, as well as appropriately trained personnel, to safely conduct spent fuel cask handling activities.

Accordingly, the NRC has determined in accordance with 10 CFR 72.7 that this exemption is authorized by law, will not endanger life or property or the common defense and security, and is otherwise in the public interest. Therefore, the NRC hereby grants the licensee an exemption from the 30-day waiting period required by 10 CFR 72.82(e). The effective date of this exemption shall be December 26, 1995. This exemption will allow the licensee, effective December 26, to commence loading spent fuel into the dry storage canister, for subsequent transfer to and storage in the Davis-Besse ISFSI. The exemption also permits the licensee, prior to December 26, to start any necessary work that is a prerequisite to loading fuel on December 26. While not providing Toledo Edison Company the full schedular relief it requested, the exemption will result in the Company being able to begin dry storage activities approximately two weeks earlier than without the exemption.

The documents related to this proposed action are available for public inspection and for copying (for a fee) at the NRC Public Document Room at the Gelman Building, 2120 L Street, NW, Washington, DC 20555, and at the Local Public Document Room located in the William Carlson Library, University of Toledo, 2801 West Bancroft Avenue, Toledo, Ohio 43605.

Pursuant to 10 CFR 51.32, the NRC has determined that granting this exemption will have no significant impact on the quality of the human environment (60 FR 52709).

Dated at Rockville, Maryland this 20th day of December 1995.

## OFFICE OF GOVERNMENT ETHICS

### Advance Notice of Proposed Modified Form for Requesting Access to Executive Branch Public Financial Disclosure Reports and Other Covered Records to Be Submitted to OMB for Approval Under the Paperwork Reduction Act

**AGENCY:** Office of Government Ethics (OGE).

**ACTION:** Notice.

**SUMMARY:** The Office of Government Ethics plans to submit a slightly modified OGE form used by persons for requesting access to executive branch public financial disclosure reports and other covered records for approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act. This modified form will replace the existing one.

**DATES:** Comments on this proposal should be received by March 19, 1996.

**ADDRESSES:** Comments should be sent to William E. Gressman, Office of Government Ethics, Suite 500, 1201 New York Avenue, NW., Washington, DC 20005-3917.

**FOR FURTHER INFORMATION CONTACT:** Mr. Gressman at the Office of Government Ethics; telephone: 202-523-5757, ext. 1110; FAX: 202-523-6325. A copy of OGE's draft form may be obtained, without charge, by contacting Mr. Gressman.

**SUPPLEMENTARY INFORMATION:** The Office of Government Ethics is planning to submit, after this notice and comment period (with any modifications that may appear warranted), a proposed modified OGE Form 201 "Request to Inspect or Receive Copies of SF 278 Executive Branch Personnel Public Financial Disclosure Report or Other Covered Record" for three-year approval by OMB under the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35). Once finally approved by OMB and adopted by OGE, the modified version of this OGE form will replace the existing version (whose paperwork clearance is scheduled to expire at the end of next July).

The Office of Government Ethics, as the supervising ethics office for the executive branch of the Federal Government under the Ethics in Government Act (the "Ethics Act"), is planning to modify and update the existing access form. That form, the OGE Form 201, collects information from, and provides certain information to, persons who seek access to SF 278 reports and other covered records. The form reflects the requirements of the
