SUPPLEMENTARY INFORMATION:

I. Background

The Alien Labor Certification Program operates under regulations at 20 CFR 655 and 656. The Alien Certification Program, as administered by the Department of Labor, requires the State employment security agencies (SESAs) to initially process applications for alien certifications filed by U.S. employers on behalf of alien workers wishing to enter the U.S. for permanent employment and certain temporary employment purposes, conduct wage surveys, provide wage information to U.S. employers wishing to employ foreign workers, conduct housing inspections of facilities employers offer to migrant and seasonal workers, and recruit for qualified U.S. workers for employers applying for alien certification. The SESAs perform these functions under a reimbursable grant that is awarded annually. The data from this report provides important program information about SESA workload in a number of immigration programs and provides ETA with more timely management information. The data is used for program monitoring and evaluation and for future distribution of alien certification funds.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. STN 50-456 and STN 50-457]

Commonwealth Edison Company; Notice of Withdrawal of Application for Amendment to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Commonwealth Edison Company (the licensee) to withdraw its August 15, 1995, application for proposed amendment to Facility Operating License Nos. NPF-72 and NPF-77, for the Braidwood Station, Unit 1, located in Will County, Illinois.

The proposed amendment would have modified the facility technical specifications to renew the 1.0 volt interim plugging criteria (IPC) for the Braidwood, Unit 1, steam generators (SG) in accordance with Generic Letter 95-05, "Voltage-Based Repair Criteria for Westinghouse Steam Generators Tubes Affected by Outside Diameter Stress Corrosion Cracking," dated August 3, 1995. This request was made as a contingency in the event that the 3.0 volt IPC which ComEd had previously submitted on February 13, 1995, was not approved in order to support the startup of Braidwood, Unit 1, from the Cycle 5 refueling outage. On November 9, 1995, the NRC issued Amendment No. 69, thereby nullifying the August 15, 1995, request. Subsequently, by letter dated November 13, 1995, you withdrew the amendment request.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the Federal Register on October 5, 1995, (60 FR 52222). However, by letter dated November 13, 1995, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated August 15, 1995, and the licensee's letter dated November 13, 1995, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Wilmington Public

Library, 201 S. Kankakee Street, Wilmington, Illinois 60481.

Dated at Rockville, Maryland, this 1st day of January 1996.

For the Nuclear Regulatory Commission.

Ramin R. Assa,

Project Manager, Project Directorate III-2, Division of Reactor Projects-III/IV, Office of Nuclear Reactor Regulation.
