**DEPARTMENT OF DEFENSE****Department of the Air Force****Notice of Intent To Prepare an Environmental Impact Statement for Enhanced Training In Idaho Mountain Home AFB, ID**

The United States Air Force intends to prepare an Environmental Impact Statement (EIS) to analyze the proposed action regarding the establishment of a tactical training range in Owyhee County, Idaho supporting enhanced training for Mountain Home AFB and the Idaho Air National Guard. In conjunction with the range, modification of airspace would occur in the state of Idaho and Nevada. This proposal will be known as Enhanced Training in Idaho (ETI).

The Air Force proposes to establish the ETI in the eastern half of Owyhee County, Idaho, near Clover Butte. This proposal would establish a series of target areas including one tactical range, five simulated bombing target areas and a series of 30 emitter sites to compliment existing assets and allow various training opportunities.

The ETI would consist of a 12,000-acre tactical range designed to provide aircrews with a realistic target array that allows simultaneous attacks from any axis. Only small training munitions would be expended on the tactical range. In addition, the Air Force would establish five simulated bombing sites on which no ordnance would be expended. The simulated bombing target areas would consist of two industrial complexes with a railyard, two Surface-to-Air Missile sites, and a Forward Edge of Battle Area array. Four of the simulated bombing areas would each cover 5-acres and the remaining area would cover 1-square mile.

In addition to the target areas, the Air Force would establish ten 1-acre emitter sites and twenty 0.25-acre emitter sites. These emitter sites would allow the placement of simulated enemy threat radars to provide aircrews with a diverse target/threat array. In total, the proposed ETI would supplement the existing range facilities, and allow various target numbers and locations to provide realism and simulate anticipated combat conditions.

Airspace actions associated with the ETI would permit more efficient utilization of the airspace and range assets. The proposal includes expansion of the Owyhee Military Operations Area (MOA) to the north and expansion of the Paradise East MOA to the southeast to join the Owyhee MOA. Restricted airspace would be restructured within
