

adjustment shall be calculated in accordance with Section II c(i) and (ii) of the suspension agreement.

With respect to the use of duty drawback, the Department verified that the amount received was not in excess of the import duties paid on physically incorporated inputs. Thus, the signatories were not in violation. (See verification report dated June 1, 1995).

Finally, the participation in the international trade promotion fund by four signatories does not confer a benefit because the Department verified that the signatories paid their own expenses. Furthermore, the Department has never determined this program to be countervailable.

Comment 2

ECS wants assurance that any benefits found by the Department during the period of review are repaid to the RTG in order to reverse any benefits received by the Thai yarn producers during the POR.

Department's Position

As stated above, the Department will require that Thai Melon repay the amount in which the tax certificate exceeds the import duties on physically incorporated inputs. If Thai Melon fails to comply with this requirement, the Department will have grounds to determine that the signatory has violated the agreement.

Comment 3

ECS urges the Department to maintain close scrutiny over the administration of the agreement so that the U.S. industry can be assured that the subsidies found by the Department will be repaid to the RTG and that such benefits will not continue in the future.

Department's Position

The Department will continue to closely monitor the administration of the agreement in order to ensure that the excess amount of the tax certificate is repaid and that the signatories do not receive any benefits in the future that would constitute a violation of the agreement.

Final Results of Review

For the period January 1, 1993 through December 31, 1993, we determine that the signatories were not in violation of the suspension agreement.

This notice serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance

with 19 C.F.R. 355.34(d). Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)(1994)) and 19 CFR 3.5.5.22 (1994).

DEPARTMENT OF DEFENSE**Department of the Air Force****Notice of Intent To Prepare an Environmental Impact Statement for Enhanced Training In Idaho Mountain Home AFB, ID**

The United States Air Force intends to prepare an Environmental Impact Statement (EIS) to analyze the proposed action regarding the establishment of a tactical training range in Owyhee County, Idaho supporting enhanced training for Mountain Home AFB and the Idaho Air National Guard. In conjunction with the range, modification of airspace would occur in the state of Idaho and Nevada. This proposal will be known as Enhanced Training in Idaho (ETI).

The Air Force proposes to establish the ETI in the eastern half of Owyhee County, Idaho, near Clover Butte. This proposal would establish a series of target areas including one tactical range, five simulated bombing target areas and a series of 30 emitter sites to compliment existing assets and allow various training opportunities.

The ETI would consist of a 12,000-acre tactical range designed to provide aircrews with a realistic target array that allows simultaneous attacks from any axis. Only small training munitions would be expended on the tactical range. In addition, the Air Force would establish five simulated bombing sites on which no ordnance would be expended. The simulated bombing target areas would consist of two industrial complexes with a railyard, two Surface-to-Air Missile sites, and a Forward Edge of Battle Area array. Four of the simulated bombing areas would each cover 5-acres and the remaining area would cover 1-square mile.

In addition to the target areas, the Air Force would establish ten 1-acre emitter sites and twenty 0.25-acre emitter sites. These emitter sites would allow the placement of simulated enemy threat radars to provide aircrews with a diverse target/threat array. In total, the proposed ETI would supplement the existing range facilities, and allow various target numbers and locations to provide realism and simulate anticipated combat conditions.

Airspace actions associated with the ETI would permit more efficient utilization of the airspace and range assets. The proposal includes expansion of the Owyhee Military Operations Area (MOA) to the north and expansion of the Paradise East MOA to the southeast to join the Owyhee MOA. Restricted airspace would be restructured within
