

estimated that it will take one person-hour to read the instructions. The ICR uses 60 burden hours for the initial performance test this includes the burden to write the report of the performance test. It is assumed that 20% of all affected facilities will have to repeat performance tests.

The following is a breakdown used in the ICR. Burden is calculated as two hours each for respondents to gather existing information and write the reports for; notification of construction/modification, notification of anticipated start-up, and notification of initial performance test. The burden is calculated as one hour for respondents to gather existing information and write a report for notification of actual start-up. These are all one time only burdens. These notifications, reports and records are required in general, of all sources subject to NSPS.

Recordkeeping is the only ongoing burden associated with this ICR. The recordkeeping burden—time to enter information—records of start-up, shutdown, malfunction, or any periods during which the monitoring system is inoperative is estimated to be one and one half hours 50 times per year or about one occurrence per week.

The burden to enter records of tank identification numbers is 0.1 of an hour with the assumption it takes six minutes to enter each tank truck identification number. It is estimated there will be approximately 2,100 truck loadings per year based on six tank trucks each day multiplied by 350 days per year. It is estimated that leak detection records from monthly inspection of control equipment is one person-hour every two years.

This estimate includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: January 24, 1996.

Elaine G. Stanley,

Director, Office of Compliance.

Standards of Performance for New Stationary Sources, Supplemental Delegation of Authority to Alabama

AGENCY: Environmental Protection Agency (EPA).

ACTION: Informational notice.

SUMMARY: On June 10, 1991, and August 14, 1995, the Alabama Department of Environmental Management (ADEM) requested that EPA delegate authority for implementation and enforcement of additional categories of New Source Performance Standards (NSPS). Since EPA's review of Alabama's pertinent laws, rules, and regulations showed them to be adequate and effective procedures for the implementation and enforcement of these Federal standards, EPA has made the delegation as requested.

EFFECTIVE DATE: The effective date of these delegations of authority are June 10, 1991, and November 29, 1995.

ADDRESSES: Copies of the request for delegation of authority and EPA's letter of delegation are available for public inspection during normal business hours at the following locations:

Environmental Protection Agency,
Region IV, Air Programs Branch, 345
Courtland Street, Atlanta, Georgia
30365.

Alabama Department of Environmental
Management, 1751 Congressman W.
L. Dickinson Drive, Montgomery,
Alabama 36109.

Effective immediately, all requests, applications, reports and other correspondence required pursuant to the newly delegated standards should not be submitted to the Region 4 office, but should instead be submitted to the following address: Alabama Department of Environmental Management, 1751 Congressman W. L. Dickinson Drive, Montgomery, Alabama 36109.

FOR FURTHER INFORMATION CONTACT: Kimberly Bingham, Regulatory Planning and Development Section, Air Programs Branch, United States Environmental Protection Agency, Region 4, 345 Courtland Street N.E., Atlanta, Georgia 30365, (404) 347-3555, x4195.

SUPPLEMENTARY INFORMATION: Section 301, in conjunction with Sections 110 and 111(c)(1) of the Clean Air Act as amended November 15, 1990, authorizes EPA to delegate authority to implement and enforce the standards set out in 40 CFR Part 60, New Source Performance Standards (NSPS).

On August 5, 1976, EPA initially delegated the authority for implementation and enforcement of the

NSPS programs to the State of Alabama. On June 10, 1991, and August 14, 1995, Alabama requested a delegation of authority for implementation and enforcement of the following NSPS categories found in 40 CFR Part 60.

40 CFR Part 60

1. Standard of Performance for Sewage Treatment Plants, as specified in 40 CFR part 60, Subpart O, as amended by 59 FR 5107, February 3, 1994, as adopted March 16, 1995. Section 61.174(a) within Subpart O cannot be delegated.

2. Standard of Performance for Automobile and Light-Duty Truck Surface Coating Operations, as specified in 40 CFR part 60, Subpart MM, as amended by 59 FR 51383 October 11, 1994, as adopted March 16, 1995.

3. Standard of Performance for Volatile Organic Compound (VOC) Emissions from the Synthetic Organic Chemical Manufacturing Industry (SOCMI) Reactor Processes, as amended by 58 FR 45948 (August 31, 1993), as specified in 40 CFR part 60, Subpart RRR, and as adopted March 16, 1995. Section 60.703(e) of Subpart RRR cannot be delegated.

4. Volatile Organic Compound Emissions from the Synthetic Organic Chemical Manufacturing Industry (SOCMI) Air Oxidation Unit Processes, as amended by 55 FR 26912 (June 29, 1990) and 55 FR (September 7, 1990), as specified in 40 CFR part 60, Subpart III. Section 60.613(e) of Subpart III cannot be delegated.

5. Standard of Performance for Volatile Organic Compound (VOC) Emissions from the Synthetic Organic Chemical Manufacturing Industry (SOCMI) Distillation Operations, as amended by 55 FR 26931 (June 29, 1990) and 55 FR 36932 (September 7, 1990), as specified in 40 CFR part 60, Subpart NNN. Section 60.663(e) of Subpart NNN cannot be delegated.

6. Standard of Performance for Small Industrial-Commercial-Institutional Steam Generating Units, as amended by 55 FR 37674 (September 12, 1990), as specified in 40 CFR part 60, Subpart Dc. Section 60.48c(a)(4) cannot be delegated.

7. Standard of Performance for Petroleum Refineries, as amended by 55 FR 40171 (October 2, 1990), as specified in 40 CFR part 60, Subpart J. Sections 60.105(a)(13)(iii) and 60.106(i)(12) cannot be delegated.

After a thorough review of the request, the Regional Administrator determined that such a delegation was appropriate for this source category with the conditions set forth in the original delegation letter of August 5, 1976 and

subsequent delegation letters of March 29, 1982; April 5, 1985; June 2, 1987; December 2, 1988; and February 20, 1991. Alabama sources subject to the requirements of this subpart will now be under the jurisdiction of Alabama.

Since review of the pertinent Alabama laws, rules, and regulations showed them to be adequate for the implementation and enforcement of the aforementioned categories of NSPS and NESHAPs, the EPA hereby notifies the public that it has delegated the authority for the source categories listed above on June 10, 1991, and November 20, 1995. The Office of Management and Budget has exempted this rule from the requirements of section 6 of Executive Order 12866.

Authority: This notice is issued under the authority of sections 101, 110, 111, 112, and 301 of the Clean Air Act, as Amended (42 U.S.C. 7401, 7410, 7411, 7412, and 7601).

Dated: January 12, 1996.

Phyllis P. Harris,

Acting Regional Administrator.

Accidental Release Prevention Requirements: Risk Management Programs Under Section 112(r)(7) of the Clean Air Act as Amended; Draft Guidances

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability.

SUMMARY: Section 112(r)(7) of the Clean Air Act (CAA), as amended, requires the Environmental Protection Agency (EPA) to develop guidance documents, including model risk management plans, to assist stationary sources in the development of risk management programs. The following three draft guidance documents are available for review in Docket No. A-91-73 Category VIII-A: "Offsite Consequence Assessment"; "Generic Guidance Risk Management Program (RMP) for Ammonia Refrigeration Facilities"; and "Risk Management Plan Data Elements." The Agency is interested in continued dialogue on the guidances with interested members of the public and will issue guidance at the time it promulgates the Risk Management Program regulations.

DATES: Those who wish to express their views concerning the material contained in the guidances should submit written comments by February 29, 1996, to Docket A-91-73 Category VIII-B, at the

address below, or via e-mail to A-and-R-Docket@epamail.epa.gov.

ADDRESSES: *Docket.* These documents are in Docket A-91-73 Category VIII-A and available for public inspection and copying between 8 a.m. and 5:30 p.m., Monday through Friday, including all non-Governmental holidays, at EPA's Air and Radiation Docket and Information Center, room M1500, U.S. Environmental Protection Agency (6102), 401 M Street SW., Washington, DC 20460.

Electronic Access. These documents can be accessed in electronic format through the Internet system and through EPA's Technology Transfer Network (TTN), a network of electronic bulletin boards operated by the Office of Air Quality Planning and Standards. The Internet address of EPA's gopher server is GOPHER.EPA.GOV. This information is also available using File Transfer Protocol (FTP) on FTP.EPA.GOV or using World Wide Web (WWW) (<http://earth1.epa.gov/ceppo>). The TTN service is free, except for the cost of a phone call. To access the TTN, dial (919) 541-5742 for up to a 14,400 bits per second (bps) modem. If more information on TTN is needed, contact the systems operator at (919) 541-5382.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: A-and-R-Docket@epamail.epa.gov. Electronic comments must be submitted as ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number A-91-73 Category VIII-B. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this draft guidance may be filed online at many Federal Depository Libraries.

FOR FURTHER INFORMATION CONTACT: For technical information on the "Generic Guidance Risk Management Program (RMP) for Ammonia Refrigeration Facilities" or the draft "Risk Management Data Elements", contact Lyse Helsing, (202) 260-6128. For technical information on the draft "Offsite Consequence Assessment", contact Craig Matthiessen, (202) 260-9781. To order copies of these documents, please FAX requests to the Emergency Planning and Community Right-to-Know Information Hotline (Hotline) at (703) 412-3333. The Hotline is also available to answer questions at (800) 535-0202 or (703) 412-9877 when calling from local Washington, DC area.

SUPPLEMENTARY INFORMATION: EPA announces the availability of draft guidances that will assist stationary sources in complying with the provisions of CAA section 112(r)(7)(B), including the requirement to prepare risk management plans. The documents made available today are drafts of guidances and would not, when finalized, create any obligations on the part of entities subject to CAA section 112(r)(7)(B); thus, these documents are neither regulations nor proposed regulations.

EPA proposed Risk Management Program regulations to implement CAA section 112(r)(7) on October 20, 1993 (58 FR 54190) and March 13, 1995 (60 FR 13528). For information on the proposed regulations, please see the above-referenced notices. Furthermore, for information on chemicals, sources, and processes subject to CAA section 112(r)(7), please see 40 CFR part 68 and the notice establishing these provisions (59 FR 4478, January 31, 1994).

The draft "Offsite Consequence Assessment" guidance contains all the methodologies and reference tables that would be necessary to develop and analyze the consequences of worst case and more likely ("alternative case") scenarios for the regulations under CAA section 112(r)(7)(B). This guidance is designed to help those sources subject to section 112(r)(7) comply with the offsite consequence requirements without specific expertise or access to computer-based and more sophisticated modeling tools. EPA contemplates that sources will be able to use the modeling results contained in a final guidance or other appropriate modeling results in complying with the section 112(r)(7) regulations.

The draft "Generic Guidance Risk Management Program (RMP) for Ammonia Refrigeration Facilities" is a model program and plan that will help owners and operators of ammonia refrigeration facilities comply with the CAA section 112(r). The draft guidance includes a section on hazard assessment and on emergency response, and four appendices: (A) Selection of scenarios; (B) background information on ammonia modeling; (C) effect of ammonia releases on structures; and (D) refrigerated ammonia release modeling.

The Risk Management Program regulation will require submission of risk management plans. The draft Risk Management Data Elements maps out the kinds of information that would be submitted by each source as its risk management plan. The draft includes an executive summary, registration, data on worst case and alternative releases for toxics and for flammables, five-year
