

sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

The annual reporting burden is estimated as follows: Respondents (includes first-tier subcontractors), 167,487; responses per respondent, 1; total annual responses, 167,487; preparation hours per response, 0.50; and total response burden hours, 83,744.

Obtaining Copies of Justifications

Requester may obtain copies of justifications from the General Services Administration, FAR Secretariat (MVRS), Room 4037, Washington, DC 20405, telephone (202) 501-4755. Please cite OMB Control No. 9000-0139, Federal Acquisition and Community Right-to-Know, in all correspondence.

Dated: January 25, 1996.

Beverly Fayson,
FAR Secretariat.

[FR Doc. 96-1902 Filed 1-30-96; 8:45 am]

BILLING CODE 6820-EP-M

[OMB Control No. 9000-0108]

Clearance Request Entitled Bankruptcy

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000-0108).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Bankruptcy. A request for public comments was published at 60 FR 54221, October 20, 1995. No comments were received.

DATES: Comment Due Date: March 1, 1996.

ADDRESSES: Comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, should be submitted to: FAR Desk Officer, OMB, Room 10102, NEOB, Washington, DC 20503, and a copy to the General Services Administration, FAR Secretariat (MVRS), 18th & F Streets, NW, Room 4037, Washington, DC 20405. Please cite OMB Control No. 9000-0108, Bankruptcy, in all correspondence.

FOR FURTHER INFORMATION CONTACT: Ms. Linda Klein, Office of Federal Acquisition Policy, GSA (202) 501-3775.

SUPPLEMENTARY INFORMATION:

A. Purpose

Under statute, contractors may enter into bankruptcy which may have a significant impact on the contractor's ability to perform its Government contract. The Government often does not receive adequate and timely notice of this event. The subject contract clause requires contractors to notify the contracting officer within five days after the contractor enters into bankruptcy.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

The annual reporting burden is estimated as follows: Respondents, 1,000; responses per respondent, 1; total annual responses, 1,000; preparation hours per response, 1; and total response burden hours, 1,000.

C. Annual Recordkeeping Burden

The annual recordkeeping burden is estimated as follows: Recordkeepers, 1,000; hours per recordkeeper, .25; and total recordkeeping burden hours, 250.

OBTAINING COPIES OF JUSTIFICATIONS:

Requester may obtain copies of justifications from the General Services Administration, FAR Secretariat (MVRS), Room 4037, Washington, DC 20405, telephone (202) 501-4755. Please cite OMB Control No. 9000-0108, Bankruptcy, in all correspondence.

Dated: January 26, 1996.

Beverly Fayson,
FAR Secretariat.

DEPARTMENT OF DEFENSE

Department of the Army

Advisory Committee Notice

AGENCY: I Corps, Fort Lewis, WA.

ACTION: Notice of open meeting .

SUMMARY: In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following meeting.

Name of Committee: Yakima Training Center Cultural and Natural Resources Committee—Policy Committee.

Date of Meeting: February 15, 1996.

Place of Meeting: Yakima Training Center, Building 266, Yakima, Washington.

Start Time of Meeting: 1:30 p.m.

Proposed Agenda: After action review of Cascade Sage 95 and Cultural and Natural Resources Management Plan update. All proceedings are open.

FOR FURTHER INFORMATION CONTACT: Stephen Hart, Chief, Civil Law, (206) 967-0793.

SUPPLEMENTARY INFORMATION: None.

Gregory D. Showalter,
Army Federal Register Liaison Officer.

BILLING CODE 3710-08-M

Department of the Navy

Revised Record of Decision on the Upgrade of the Wastewater Treatment System at Marine Corps Base, Camp Lejeune, NC

Pursuant to Section 102(c) of the National Environmental Policy Act (NEPA), and the Council on Environmental Quality Regulations (40 CFR parts 1500-1508), the Department of the Navy announced, on August 8, 1994, its decision to upgrade the wastewater treatment system at Marine Corps Base (MCB) Camp Lejeune, North Carolina. The upgrade involves removing three discharge points from the most nutrient sensitive waters of the upper New River, removing two discharge points in proximity to high quality shellfishing waters of the lower New River, and removing a discharge point to the Atlantic Intracoastal Waterway at Onslow Beach. The first phase requires construction of approximately 35 miles of new wastewater transmission pipelines, and consolidates flows at an outfall located in the New River near the existing Hadnot Point treatment plant. Phase I also includes construction of rapid infiltration system facilities at Onslow Beach to handle 120,000 gallons per day (gpd) of wastewater currently discharged to the Atlantic Intracoastal Waterway. Phases II and III involve construction of a new 15 million gallons per day (MGD) advanced wastewater treatment plant capable of a high degree of nutrient removal, and a new outfall diffuser pipe located about 13 miles upstream from the mouth of the New River. The new advanced wastewater treatment plant will be in operation by December 31, 1998.

The alternative to treat all base effluent (including Onslow Beach effluent) at a new advanced treatment plant with discharge to the New River was identified as the preferred alternative in the Draft Environmental Impact Statement (DEIS). In response to comments on the DEIS, additional analysis was undertaken to examine options for land application of Camp Lejeune wastewater. The environmentally preferred alternative identified in the Final Environmental Impact Statement (FEIS) was a combination of a new advanced wastewater treatment facility located in the French Creek area of Camp Lejeune with discharge into the New River and a new rapid infiltration facility at Onslow Beach.

In coordination with the North Carolina Department of Environment, Health and Natural Resources (NCDEHNR), four sites were initially identified in the FEIS as candidate sites for the Onslow Beach rapid infiltration system facility. One site was eliminated because of evidence of poor percolation. Another site had been a disposal area for dredged material from the Atlantic Intracoastal Waterway, and accordingly did not possess subsurface conditions that allowed effluent to move at a proper pace through the soil, thus not allowing for proper treatment. The third site was located on a narrow portion of the island and would impact the seaward dune line and wetlands. The final site, which was identified in the Record of Decision (ROD), offered the best conditions, appeared to have sufficient land area, and was of sufficient elevation.

Geological investigations conducted subsequent to publication of the ROD revealed that the site selected for the Onslow Beach rapid infiltration system facility has a high water table and soils not conducive to such a facility. These investigations concluded that the water table of the site selected occurs within a few feet of the surface. Furthermore, modeling results indicate that effluent would emerge at ground surface within and around the recharge areas in a matter of days after effluent application began, resulting in failure of the system as defined by NCDEHNR. Therefore, based on the failure criterion of NCDEHNR, land disposal of treated domestic wastewater effluent at this site is not feasible. Other areas of the island have characteristics similar to the four sites investigated. Therefore, no suitable sites are available anywhere on Onslow Beach.

Because operation of a rapid infiltration system at Onslow Beach is not feasible from an engineering

perspective, the Department of the Navy announces its decision to pump the estimated 120,000 gpd of effluent from Onslow Beach to the new advanced treatment plant. The treated effluent will be discharged through the new diffuser. Prior to completion of the new advanced treatment plant and diffuser, the Onslow Beach effluent will be discharged at an existing outfall in the New River.

Impacts of the construction and operation of the 15 MGD advanced treatment plant were identified in the ROD published on August 8, 1994. The additional flow from the Onslow Beach area is minimal in relation to the plant size (less than 1% of projected flows). The design capacity of the new plant will remain at 15 MGD. Accordingly, impacts discussed in the DEIS and FEIS of the advanced treatment plant will be the same. The discussion below summarizes the impact of the construction of the approximately 5 miles of 8 inch pipeline required to pump effluent from Onslow Beach to the new plant.

The pipeline will be constructed generally along existing utility and road rights-of-way. The pipeline will be submerged as it crosses the Atlantic Intracoastal Waterway. To minimize impacts on the aquatic environment, the crossing will be accomplished using directional drilling. No tidal wetland areas adjacent to the Atlantic Intracoastal Waterway will be disturbed as the directional drilling will tunnel beneath wetland areas. Closing of the Atlantic Intracoastal Waterway will not be required during construction. All necessary permits will be obtained from the U.S. Army Corps of Engineers prior to construction of the pipeline. Construction will not begin prior to receipt of a concurrence by the North Carolina Division of Coastal Management on the Marine Corps coastal consistency determination.

The pipeline will require crossing a freshwater wetland. This crossing is authorized under Nationwide Permit Number 12. The U.S. Army Corps of Engineers will be notified of the crossing prior to construction.

The pipeline will generally follow existing rights-of-way and will follow the contour of existing topography. The pipeline will be buried and post construction contours will be returned to their original condition. Some compaction of soils and removal of vegetation may occur creating a potential for soil erosion impacts. However, compliance with erosion and sedimentation control regulations will minimize the potential for impacts.

Some minor clearing may be involved resulting in minimal impacts to terrestrial wildlife. No rare plant species were located during the survey of this pipeline segment. The pipeline will pass near a red-cockaded woodpecker colony along Sneads Ferry Road. The existing right-of-way along Sneads Ferry Road will be used and no impacts to any existing cavity trees of foraging habitat will occur. No impacts due to construction activities (e.g., noise) will occur to this endangered species. The U.S. Fish and Wildlife Service concurs with this finding.

One archeological site was identified along the pipeline corridor during a Phase I archeological investigation. Additional testing confirmed that this site is outside pipeline construction boundaries. Therefore, pipeline construction will not affect cultural resources listed or determined eligible for listing on the National Register of Historic Places. The North Carolina Department of Cultural Resources concurs with this finding. Construction in the vicinity of the site will be conducted so as to avoid ground disturbing activities outside of the pipeline corridor.

The Department of the Navy believes that there are no outstanding issues to be resolved with respect to this project. Questions regarding the Environmental Impact Statement prepared for this action may be directed to Mr. Robert Warren, Environmental Management Department, MCB Camp Lejeune, NC 28542, telephone (910) 451-5003.

Dated: January 26, 1996.

Duncan Holaday,

*Deputy Assistant Secretary of the Navy,
(Installations and Facilities).*

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of Proposed Information Collection Requests.

SUMMARY: The Director, Information Resources Group, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before April 1, 1996.

ADDRESSES: Written comments and requests for copies of the proposed information collection requests should
