

Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 672.

The interim specification of pollock total allowable catch in Statistical Area 61 was established by Interim 1996 Harvest Specifications (60 FR 61492, November 30, 1995) as 6,125 metric tons (mt), determined in accordance with § 672.20(c)(1)(ii)(A).

The Director, Alaska Region, NMFS (Regional Director), has determined, in accordance with § 672.20(c)(2)(ii), that the 1996 interim specification of pollock in Statistical Area 61 soon will be reached. The Regional Director established a directed fishing allowance of 5,925 mt, and has set aside the remaining 200 mt as bycatch to support other anticipated groundfish fisheries. Consequently, NMFS is prohibiting directed fishing for pollock in Statistical Area 61 until superseded by the Final 1996 Harvest Specifications for Groundfish in the Federal Register.

Maximum retainable bycatch amounts for applicable gear types may be found in the regulations at § 672.20(g).
