Pursuant to Title V of the North American Free Trade Agreement Implementation Act (Pub.L. 103-182) concerning transitional adjustment assistance, an investigation was initiated on January 10, 1996 in response to a worker petition which was filed on January 10, 1996 on behalf of workers at Equitable Resources Energy Company, Buckhannon, West Virginia and various locations in the state of Pennsylvania.

An active certification covering the petitioning group of workers remains in effect (NAFTA-662 and 662A). Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Walker Manufacturing Company, Hebron, OH; Amended Certification Regarding Eligibility to Apply for NAFTA Transitional Adjustment Assistance

In accordance with Section 250(a), Subchapter D, Chapter 2, Title II, of the Trade Act of 1974, as amended (19 USC 2273), the Department of Labor issued a Revised Determination on Reconsideration for NAFTA Transitional Adjustment Assistance on December 15, 1995, applicable to all workers at the subject firm. The notice will soon be published in the Federal Register.

The Department inadvertently set the impact date as May 20, 1993, a date prior to the effective date of the NAFTA program which is December 8, 1993. Therefore, the Department is amending

the certification to properly reflect this matter.

The amended notice applicable to NAFTA-00120 is hereby issued as follows:

“All workers of Walker Manufacturing Company, Hebron, Ohio who became totally or partially separated from employment on or after December 8, 1993 are eligible to apply for NAFTA-TAA under Section 250 of the Trade Act of 1974.”

Signed at Washington, DC, this 22nd day of January 1996.

NUCLEAR REGULATORY COMMISSION

[Docket No. 40-3453]

Notice of Issuance of Amendment 26 to Source Material License SUA-917 Amending License Condition (LC) 55 for Atlas Corporation's (Atlas') Uranium Mill Facility at Moab, Utah

AGENCY: Nuclear Regulatory Commission.

ACTION: Amendment 26 to Source Material License SUA-917, issued January 22, 1996, amends LC 55 to show that interim cover placement has been completed.

SUMMARY: By letter dated October 25, 1995, Atlas Corporation (Atlas) submitted a request to amend condition 55 (LC 55) of Source Material License No. SUA-917. LC 55 lists the completion dates for reclamation milestones established as targets in the

Memorandum of Understanding (MOU) with the Environmental Protection Agency (EPA) (56 FR 55432, October 25, 1991). Atlas requested that the license date for completion of placement of the interim cover in LC 55A.(2), be changed from October 31, 1995 to November 30, 1995. By letter dated November 13, 1995, Atlas notified NRC that it completed placement of the cover on November 10, 1995. Atlas' failure to complete the interim cover on the tailings impoundment by October 30, 1995, was due to unanticipated problems in actually placing cover over areas of the pile that had previously been covered by water. Atlas had been placing the interim cover since October 4, 1995, and at the time of its license amendment request, had completed 60 percent of this final phase and 92 percent of the entire pile. On January 22, 1996, the license was amended to show that placement of the interim cover was complete.

FOR FURTHER INFORMATION CONTACT: Myron Fliegel, Office of Nuclear Material Safety and Safeguards, Washington, DC 20555, Telephone: 301-415-6629.

Signed at Rockville, MD, this 30th day of January 1996.
