

**SUPPLEMENTARY INFORMATION:**

*Title:* Used Oil Management Standards Recordkeeping and Reporting Requirements, ICR No. 1286.04, OMB No. 2050-0124, expires 3/31/99. This is a request for reinstatement of a currently approved collection.

*Abstract:* Under statutory authority found in section 3014 of RCRA, EPA established mandatory regulations (See 40 CFR Part 279) that control the storage of used oil in aboveground tanks and containers to minimize potential releases from these units. It establishes notification and testing requirements, and tracking and recordkeeping requirements for used oil transporters, processors, re-refiners, and burners to document the movement of used oil. It also sets standards for the prevention and cleanup of releases to the environment during storage and transit and for the safe closure of storage units and processing and re-refining facilities to mitigate future releases and damages. EPA believes these requirements mitigate potential hazards to human health and the environment from the potential mismanagement of used oils by used oil handlers, while providing for the recycling of used oil. This information will be used to ensure compliance with the Used Oil Management Standards.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. *Abstract:* In order for a State to obtain final authorization for a State hazardous waste program or to revise its previously authorized program, it must submit an official application to the EPA Regional office for approval. The purpose of the application is to enable EPA to properly determine whether the State's program meets the requirements of § 3006 of RCRA. As required by § 271.5, the submission for final authorization must contain the following:

(1) A letter from the Governor of the State requesting program approval;

(2) A complete program description, as required by § 271.6 describing how the State intends to carry out its responsibilities under this subpart;

(3) An Attorney General's statement as required by § 271.7;

(4) A Memorandum of Agreement with the Regional Administrator as required by § 271.8;

(5) Copies of all applicable State statutes and regulations, including those governing State administrative procedures; and

(6) The showing required by § 271.20(c) of the State's public participation activities prior to program submission.

In the event that the State is revising its program by adopting new Federal requirements, the State shall prepare and submit modified revisions of the program description, Attorney General's statement, Memorandum of Agreement, or such other documents as EPA determines to be necessary. The State shall inform EPA of any proposed modifications to its basic statutory or regulatory authority, its forms, procedures, or priorities, in accordance with section 271.21. If a State is proposing to transfer all or any part of any program from the approved State

agency to any other agency, it must notify EPA in accordance with section 271.21 and submit revised organizational charts as required under section 271.6, in accordance with section 271.21. Further, whenever EPA has reason to believe that circumstances have changed with respect to a State program, EPA may request, and the State shall provide, a supplemental Attorney General's statement, program description, or such other documents or information as are necessary. These paperwork requirements are mandatory under § 3006(a). EPA will use the information submitted by the State in order to determine whether the State's program meets the statutory and regulatory requirements for authorization. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.
