FOR FURTHER INFORMATION CONTACT: Leon Jourolmon, Assistant Administrator, Finance & Marketing, Southeastern Power Administration, Department of Energy, Samuel Elbert Building, 2 South Public Square, Elberton, Georgia 30635, (706) 213-3800.

SUPPLEMENTARY INFORMATION: The Federal Power Commission by order issued December 5, 1991, in Docket No. EF91-3041-000, confirmed and approved Wholesale Power Rate Schedules KP-1-D, JHK-2-B, JHK-3-B, and PH-1-B applicable to Kerr-Philpott Projects' power for a period ending September 30, 1996.

Discussion

Existing rate schedules are predicated upon a June 1991 repayment study and

other supporting data all of which are contained in EF91-3041-000. A January 1996 repayment study prepared using present rates demonstrates that all costs are paid within their repayment life. Therefore, Southeastern is proposing to extend the four present rate schedules. The demand charge applicable to preference customers remains at the \$1.86 per kilowatt of monthly demand and the energy charge remains at 7.67 mills per kilowatt-hour.

The referenced January 1996 system repayment study along with previous system repayment studies are available for examination at the Samuel Elbert Building, 2 South Public Square, Elberton, Georgia 30635. Proposed Rate Schedules KP-1-D, JHK-2-B, JHK-3-B, and PH-1-B are also available.

Issued at Elberton, Georgia, January 25, 1996.

Charles A. Borchardt,
Administrator.

SUPPLEMENTARY INFORMATION:

Title: Used Oil Management Standards Recordkeeping and Reporting Requirements, ICR No. 1286.04, OMB No. 2050-0124, expires 3/31/99. This is a request for reinstatement of a currently approved collection.

Abstract: Under statutory authority found in section 3014 of RCRA, EPA established mandatory regulations (See 40 CFR Part 279) that control the storage of used oil in aboveground tanks and containers to minimize potential releases from these units. It establishes notification and testing requirements, and tracking and recordkeeping requirements for used oil transporters, processors, re-refiners, and burners to document the movement of used oil. It also sets standards for the prevention and cleanup of releases to the environment during storage and transit and for the safe closure of storage units and processing and re-refining facilities to mitigate future releases and damages. EPA believes these requirements mitigate potential hazards to human health and the environment from the potential mismanagement of used oils by used oil handlers, while providing for the recycling of used oil. This information will be used to ensure compliance with the Used Oil Management Standards.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Abstract: In order for a State to obtain final authorization for a State hazardous waste program or to revise its previously authorized program, it must submit an official application to the EPA Regional office for approval. The purpose of the application is to enable EPA to properly determine whether the State's program meets the requirements of § 3006 of RCRA. As required by § 271.5, the submission for final authorization must contain the following:

(1) A letter from the Governor of the State requesting program approval;

(2) A complete program description, as required by § 271.6 describing how the State intends to carry out its responsibilities under this subpart;

(3) An Attorney General's statement as required by § 271.7;

(4) A Memorandum of Agreement with the Regional Administrator as required by § 271.8;

(5) Copies of all applicable State statutes and regulations, including those governing State administrative procedures; and

(6) The showing required by § 271.20(c) of the State's public participation activities prior to program submission.

A State with an approved program may voluntarily transfer program responsibilities to EPA by notifying EPA of the proposed transfer, including submission of a plan for the orderly transfer of all relevant program information not in the possession of EPA, as required by section 271.23. Further, EPA may withdraw a State's authorized program under section 271.23.

Either EPA or the approved State may initiate a revision to the authorized program. State program revision may be necessary when the controlling Federal or State statutory or regulatory authority is modified or supplemented. In the event that the State is revising its program by adopting new Federal requirements, the State shall prepare and submit modified revisions of the program description, Attorney General's statement, Memorandum of Agreement, or such other documents as EPA determines to be necessary. The State shall inform EPA of any proposed modifications to its basic statutory or regulatory authority, its forms, procedures, or priorities, in accordance with section 271.21. If a State is proposing to transfer all or any part of any program from the approved State
