SUPPLEMENTARY INFORMATION:

Description

The energy information collection submitted to OMB for review contains:

1. *Collection of Information:* FERC-516, "Electric Rate Schedule Filings."

2. *Sponsor:* Federal Energy Regulatory Commission. The Federal Power Act requires each public utility to file for approval of rate schedules, together with related contracts and service conditions. The Commission is authorized to investigate the rates charged by public utilities to determine that the rates, terms and conditions of service are just and reasonable. If they are not, the Commission is authorized to determine and prescribe just and reasonable rates, terms and conditions.

3. *Control No.:* 1902-0096. The Commission is now requesting that OMB approve a three year extension of these mandatory collection requirements.

4. *Necessity of Collection of Information:* Submission of the information is necessary to enable the Commission to carry out its responsibility to assure that electric rates are just and reasonable. Sufficient detail must be obtained for the Commission to make informed decisions concerning the appropriate level of rates and to aide customers and other parties who may wish to challenge the rate proposed by the utility. The information enables the Commission and other parties to examine and evaluate the cost elements comprising the utility's cost of service to determine whether and how much of such cost elements should be included in the utility's rates.

5. *Respondent Description:* The respondent universe currently comprises approximately 328 public utilities, licensees, qualifying small power producers or members of public utility holding companies that are engaged in generation, transmission and sales of electric power.

6. *Estimated Burden:* 828,750 total burden hours (328 respondents, 975 responses annually, 850 average hours per response).

Statutory Authority: Sections 205, 206, 211, 212 and 301 of the Federal Power Act, 16 U.S.C. Sections 824d, 824e, 824j, 824k and 825 (1994).

Humboldt State University; Availability of Environmental Assessment

February 2, 1996.

In accordance with the National Environmental Policy Act of 1969 and

the Federal Energy Regulatory Commission's (Commission's) Regulations, 18 CFR part 380 (Order 486, 52 FR 47897), the Commission's Office of Hydropower Licensing has reviewed an exemption surrender application for the Davis Creek Hydroelectric Project, No. 6633-003. The Davis Creek Hydroelectric Project is located on Davis Creek in Humboldt County, California. The exemptee is applying for a surrender of the exemption because the project is not economically viable. An Environmental Assessment (EA) was prepared for the application. The EA finds that approving the application would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Commission's Reference and Information Center, Room 1C-1, 888 First Street NE., Washington, DC 20426.

Please submit any comments within 20 days from the date of this notice. Any comments, conclusions, or recommendations that draw upon studies, reports or other working papers of substance should be supported by appropriate documentation.
