BILLING CODE 6450-01-P

Federal Energy Regulatory Commission

[Docket No. RP96-134-000]

Southern Natural Gas Co.; Notice of Section 4 Filing

February 5, 1996.

Take notice that on January 31, 1996, Southern Natural Gas Company (Southern) tendered for filing, pursuant to Section 4 of the Natural Gas Act, a notice of termination of gathering service upon the transfer of it Miley Line facilities in Livingston Parish, Louisiana to Amoco Production (Amoco). Southern proposed that the proposed termination of service be effective March 1, 1996.

Southern states that the Miley #1 Well is not a separate receipt point on its system. Southern asserts that the receipt point for this gas and gas gathered from all of the wells in the Lockhart Crossing area is the tailgate of the Amoco Plant, downstream of the Miley Line Facilities, and that Amoco, as operator of the Plant, allocates any gas being shipped on behalf of the working interest owners from the various Lockhart Crossing Wells upstream of the Amoco Plant. Therefore, Southern maintains that its existing transportation contracts will not be affected by the transfer of the Miley line facilities to Amoco. Southern indicates that Amoco has sent a letter to all the working interest owners in the Miley #1 Well advising them of the option of entering into a gathering contract with Amoco.

Any person desiring to be heard or to protest this filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. Pursuant to Section 154.210 of the Commission's Regulations, all such motions or protests must be filed no later than February 12, 1996. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are

available for public inspection in the public Reference Room.
