Watts Bar Nuclear Plant, Unit 1, Tennessee Valley Authority; Notice of Issuance of Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission), has issued Facility Operating License No. NPF-90 (the license) to Tennessee Valley Authority (the licensee). This license authorizes operation of the Watts Bar Nuclear Plant, Unit 1 (the facility), by the licensee at reactor core power levels not in excess of 3411 megawatts thermal in accordance with the provisions of the license, the Technical Specifications (Appendix A to the license), and the Environmental Protection Plan (Appendix B to the license).

Watts Bar Nuclear Plant, Unit 1, is a pressurized-water nuclear reactor located at the licensee's site on the west bank of Chickamauga Lake in Rhea County, Tennessee.

The application for the license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license. Prior public notice of the overall action involving the proposed issuance of an operating license was published in the Federal Register on December 27, 1976 (41 FR 56244).

The Commission has determined that the issuance of this license will not result in any environmental impacts other than those evaluated in the Final Environmental Statement (NUREG-0498), and Supplement 1, since the activity authorized by the license is encompassed by the overall action evaluated in the Final Environmental Statement.

Pursuant to 10 CFR 51.52, the Commission has determined that the issuance of exemptions included in this license will have no significant impact on the environment. These determinations were published in the Federal Register on April 18, 1985 (50 FR 15516) and April 25, 1995 (60 FR 20291).
