Offering of United States Savings Bonds, Series EE

CFR Correction

In Title 31 of the Code of Federal Regulations, parts 200 to end, revised as of July 1, 1995, page 272, the text of § 351.2(g)(3)(i) is corrected to read:

§ 351.2 Description of bonds.

* * * * *

(g) * * *

(3) * * *

(i) *Guaranteed minimum investment yield and resulting values during an extended maturity period.* A bond may

be subject to one guaranteed minimum investment yield during its original maturity period and to another such yield during each of its extended maturity periods. Bonds that entered an extended maturity period from May 1, 1989, through February 1, 1993, have a guaranteed minimum investment yield of 6 percent per annum, compounded semiannually, during that extended maturity period. Bonds that entered or enter an extended maturity period on or after March 1, 1993, have a guaranteed minimum investment yield of 4 percent per annum, compounded semiannually, during that extended maturity period, or the guaranteed minimum investment yield in effect at the beginning of that period. In order to determine values for a bond during its first extended maturity period, the value of the bond at the end of its original maturity period is determined using the guaranteed minimum investment yield applicable to that period. This value is then used as the base upon which interest accrues during the first extended maturity period at the applicable guaranteed minimum investment yield for that period. The value thus attained at first extended maturity (10 years after original maturity) is then used as the

base upon which interest accrues during the second extended maturity period at the applicable guaranteed minimum investment yield for that period. The resulting semiannual values are then compared with the corresponding values determined using the applicable market-based variable investment yields.
