

published on December 28, 1995, represents part of the Coast Guard's three-step effort to establish structural and operational measures that are economically and technologically feasible for reducing the threat of oil spills from tank vessels without double hulls, as required by the Oil Pollution Act of 1990 (OPA 90). It analyzes a number of measures and describes the results of extensive cost and benefit research on those measures deemed technologically feasible.

As stated in the SNPRM, the Coast Guard will hold a public meeting on March 19, 1996. The public is invited to comment on the technological and economic feasibility of structural measures analyzed in the SNPRM. The public meeting will also enable the public to receive clarification on the regulatory assessment as published in the SNPRM, if needed.

Attendance is open to the public. With advance notice, and as time permits, members of the public may make oral presentations during the meeting. Persons wishing to make oral presentations should notify the person listed above under **FOR FURTHER INFORMATION CONTACT** no later than the day before the meeting. Written material may be submitted prior to, during, or after the meeting.

The Coast Guard finds that extending the comment period is appropriate in conjunction with holding a public meeting. Persons unable to attend the public meeting are encouraged to submit written comments. The comment period is extended until April 10, 1996.

Dated: February 13, 1996.

Joseph J. Angelo,

Director for Standards, Office of Marine Safety, Security and Environmental Protection.

[MM Docket No. 96-10; RM-8738]

Radio Broadcasting Services; Farmersville, TX

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition by Galen O. Gilbert proposing the allotment of Channel 260C3 at Farmersville, Texas, as the community's first local aural transmission service. Channel 260C3 can be allotted to Farmersville in compliance with the Commission's minimum distance separation requirements with a site restriction of 17.9 kilometers (11.2 miles) north in order to avoid short-spacing conflicts
