 BILLING CODE 6718-04-P

**44 CFR Part 67**

**Final Flood Elevation Determinations**

**AGENCY:** Federal Emergency Management Agency (FEMA).  
**ACTION:** Final rule.

**SUMMARY:** Base (1% annual chance) flood elevations and modified base flood elevations are made final for the communities listed below. The base flood elevations and modified base flood elevations are the basis for the floodplain management measures that each community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

**EFFECTIVE DATE:** The date of issuance of the Flood Insurance Rate Map (FIRM) showing base flood elevations and modified base flood elevations for each community. This date may be obtained by contacting the office where the maps are available for inspection as indicated on the table below.

**ADDRESSES:** The final base flood elevations for each community are

available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the table below.

**FOR FURTHER INFORMATION CONTACT:** Michael K. Buckley, P.E., Chief, Hazard Identification Branch, Mitigation Directorate, 500 C Street, SW., Washington, DC 20472, (202) 646-2756.

**SUPPLEMENTARY INFORMATION:** The Federal Emergency Management Agency (FEMA or Agency) makes final determinations listed below of base flood elevations and modified base flood elevations for each community listed. The proposed base flood elevations and proposed modified base flood elevations were published in newspapers of local circulation and an opportunity for the community or individuals to appeal the proposed determinations to or through the community was provided for a period of ninety (90) days. The proposed base flood elevations and proposed modified base flood elevations were also published in the Federal Register.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67.

The Agency has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and Flood Insurance Rate Map available at the address cited below for each community.

The base flood elevations and modified base flood elevations are made final in the communities listed below. Elevations at selected locations in each community are shown.

**National Environmental Policy Act.**

This rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Consideration. No environmental impact assessment has been prepared.

**Regulatory Flexibility Act**

The Associate Director, Mitigation Directorate, certifies that this rule is exempt from the requirements of the Regulatory Flexibility Act because final or modified base flood elevations are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and are required to establish and maintain community eligibility in the National Flood Insurance Program. No regulatory flexibility analysis has been prepared.

**Regulatory Classification**

This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 12612, Federalism

This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This rule meets the applicable standards of section 2(b)(2) of Executive Order 12778.

**List of Subjects in 44 CFR Part 67**

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 67 is amended as follows:

**PART 67—[AMENDED]**

1. The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq.; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12172, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

**§ 67.11 [Amended]**

2. The tables published under the authority of § 67.11 are amended as follows:

**FEDERAL COMMUNICATIONS COMMISSION**

**47 CFR Part 90**

[PR Docket No. 91-72; FCC 96-11]

**Emergency Medical Radio Service**

**AGENCY:** Federal Communications Commission.

**ACTION:** Final Rule.

**SUMMARY:** The Commission has reaffirmed its decision to establish the Emergency Medical Radio Service (EMRS), as well as reaffirmed the assignment of certain 453 MHz frequencies to the EMRS. Additionally, the Commission granted ProNet, Inc.'s request that its medical paging system operating on 453.125 MHz in the Chicago metropolitan area be

permanently grandfathered. Finally, the Commission permitted certain licensees (medical services, rescue organizations, disaster relief organizations and beach patrols) to use Channels 161-170 as they are engaged in safety-of-life services. These actions were taken to improve the communications capabilities of entities engaged in providing life support activities. The rule changes and the grant of the waiver request will ensure the reliability of emergency medical communications.  
**EFFECTIVE DATE:** March 22, 1996.

**FOR FURTHER INFORMATION CONTACT:** Freda Lippert Thyden, Wireless Telecommunications Bureau, (202) 418-0680.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's *Memorandum Opinion and Order*, PR Docket No. 91-72, FCC 96-11, adopted January 18, 1996, and released February 8, 1996. The full text of this *Memorandum Opinion and Order* is available for inspection and copying during normal business hours in the FCC Dockets Branch, Room 230, 1919 M Street N.W., Washington, D.C. The complete text may be purchased from the Commission's copy contractor, International Transcription Service, Inc., 2100 M Street, N.W., Suite 140, Washington, D.C. 20037, telephone (202) 857-3800.

This *Memorandum Opinion and Order* imposes no paperwork burden on the public.

*Summary of Memorandum Opinion and Order*

1. In this *Memorandum Opinion and Order*, we affirm the action taken in the *Report and Order* (58 Fed. Reg 12177 (March 3, 1993)), establishing the Emergency Medical Radio Service (EMRS) as a new Public Safety Radio Service under Subpart B of Part 90 of the Commission's Rules. The record substantiates the need for this new radio service to ensure the reliability of emergency medical communications. We also affirm the reassignment of four 453 MHz frequencies (453.025/.075/.125/.175 MHz) from the Special Emergency Radio Service (SERS) to the EMRS. These frequencies, previously assigned for one-way paging operations, were chosen as particularly appropriate for EMRS use because they minimize disruption to the remaining non-EMRS SERS entities.

2. ProNet, Inc. (ProNet), a petitioner for reconsideration of the *Report and Order*, mistakenly believes that it should be accorded a hearing pursuant to Section 316 of the Communications Act of 1934, as amended, before its

radio license is modified. Under this statutory provision, a license is not considered modified when the Commission—acting by rule making—affects the rights of all licensees of a particular class.

3. ProNet has substantiated its request for permanently waiving mandatory reassignment of 453.125 MHz in the greater metropolitan Chicago area to EMRS. It commissioned a study of spectrum usage in the Chicago area as well as submitted relevant affidavits. Although only required to meet one criterion, ProNet met all the established criteria to justify grant of the waiver request. First, it appears that ProNet's system is intensely utilized. Second, relocation of ProNet's medical paging system would not serve the public interest because no reasonable alternative for its paging system is available in the Chicago area. Third, petitioner illustrates the continued availability of MED channel capacity in metropolitan Chicago and, therefore, there appears to be adequate spectrum for emergency medical service transmissions in the Chicago area. ProNet has successfully demonstrated that unique circumstances are involved in its case, thus warranting waiver.

4. ProNet's request for authority to be licensed to operate transmitting facilities on 453.125 MHz anywhere in Wisconsin, Illinois and Indiana—within a one hundred mile radius of its existing site—is denied. This request involves future operations and was not contemplated by the waiver provisions contained in the *Report and Order*.

5. Finally, the Commission will permit licensees eligible to operate radio facilities as medical services (47 CFR § 90.35), rescue organizations (47 CFR § 90.37), disaster relief organizations (47 CFR § 90.41) and beach patrols (47 CFR § 90.45) to use narrowband Channels 161-170 to enable them—while conducting safety-of-life communications—to communicate with one another. These four service categories need frequencies for Mutual Aid purposes. Permitting those licensed in these categories to use Channels 161-170 in the 220-222 MHz band will serve the public interest by enhancing interoperability between many types of emergency providers in safety-of-life situations.
