L. 96-511. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. Notwithstanding any other provisions of law, no person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Federal Communications Commission

OMB Control No.: 3060-0289.

Expiration Date: 2/28/99.

Title: Performance Tests - Section 76.601.

Estimated Annual Burden: 285,084 hours annual burden; average 19.4 hours per respondent; 14,673 respondents.

Description: Section 76.601 requires that every cable system operator maintain a current listing of the cable television channels which that system delivers to its subscribers. Section 76.601(c) and (d) require cable systems

with over 1,000 subscribers to conduct semi-annual proof of performance tests and triennial proof of performance tests for color testing. This collection is being revised to request approval for the third party disclosure in section 76.601(d) requiring local franchise authorities to notify the cable operators who will be allowed third days to come in compliance with any perceived signal quality problems which need to be corrected.

OMB Control No.: 3060-0028.

Expiration Date: 2/28/99.

Title: Application for Authorization in the Auxiliary Broadcast Service.

Form: FCC Form 313.

Estimated Annual Burden: 7,749 total annual hours; average 5.166 hours per respondent; 1,500 respondents.

Description: FCC Form 313 is used by permittees or licensees of AM, FM and TV Broadcast Stations and eligible networks when applying for remote pickup, aural microwave, television microwave, and other auxiliary broadcast stations. Data is used by FCC staff to determine if proposal meets statutory requirements and to ensure that interference will not occur.

OMB Control No.: 3060-0645.

Expiration Date: 2/28/99.

Title: Antenna Registration - Part 17.

Estimated Annual Burden: 40,965 total annual hours; average 1 hour per respondent; 40,965 respondents.

Description: This recordkeeping requirement requires that those licensees who experience problems with the lighting of their antenna structure lighting to keep a record of the malfunction with the station records. This information is used by FCC personnel to ensure that antenna structure lighting systems are properly maintained.

OMB Control No.: 3060-0686.

Expiration Date: 2/28/99.

Title: Streamlining the International Section 214 Authorization Process and Tariff Requirements.

Estimated Annual Burden: 3,448 total annual hours; average 8 hours per respondent; 431 respondents.

Description: This collection contained in an NPRM proposes to Streamline the International Section 214 authorization process and tariff requirements. The proposed rules would greatly reduce the regulatory burden on the applicants, authorized carriers and the Commission. The NPRM proposes to reduce the need for carriers to file multiple applications by enabling a non-dominant carrier to obtain a global 214 authorization, which is not limited to specific carrier facilities, and by eliminating several regulatory requirements that require

carriers to file multiple Section 214 applications. The global Section 214 authorization would allow carriers to provide international services on a facilities-basis to virtually all points in the world, using any licensed facility. This authorization would be subject to an exclusion list that the Commission would publish identifying countries or facilities for which there are restrictions. In regard to regulatory requirements being removed, Section 63.01 would be amended to make it applicable only to applicants for domestic Section 214 authority. A new rule is proposed that will detail the application requirements for International Section 214 authority, and include the provisions for filing a global Section 214 application. In addition, the proposed rule will allow resellers to provide international resale services via an authorized common carrier, except those affiliated with the reseller, without obtaining additional authority. Also private line resale carriers would be able to resell interconnected private lines for switched services to all designated "equivalent" countries, without obtaining additional authority to serve each equivalent country. Section 63.15 is proposed to be amended to enable carriers to add circuits on private satellite or cable systems, without obtaining prior authority. The NPRM also proposes to simplify the section 214 and cable landing license application process by reducing the detailed information now required in Sections 63.01 and 1.767. The NPRM also proposes to encourage filing of international Section 214 applications electronically and on computer disk and to require that any information contained in the application in a foreign language be accompanied with certified English translation.

The NPRM further reduces filing requirements by allowing dominant carriers to automatically convey transmission capacity in submarine cables to other carriers without obtaining prior Section 214 authority. Also, the NPRM propose to further streamline tariff requirements for non-dominant international resale and facilities-based carriers by permitting them to file their international tariff rates on one day's notice instead of the current 14 day's notice.

OMB Control No.: 3060-0688.

Expiration Date: 2/28/99.

Title: Abbreviated Cost of Service Filing for Cable Network Upgrades.

Form: FCC Form 1235.

Estimated Annual Burden: 47,250 total annual hours; average 20 hours per
