Section 203 provides that the Commission's approval is required for transactions in which a public utility disposes of

jurisdictional facilities, merges such facilities with jurisdictional facilities owned by another person, or acquires the securities of another public utility. Under the statute, the Commission must find that a proposed transaction will be consistent with the public interest before it may approve such transaction. Section 318 exempts certain persons from the requirements of Section 203 that would otherwise concurrently apply under the Public Utility Holding

Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are cost incurred by an organization in support of its mission. these costs apply to activities which benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of

the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology e.g. permitting electronic submission of responses.
