#### I. Abstract

Data will be collected from vessel and permit owners on economic and social characteristics of firms harvesting in the West Coast limited entry fixed gear sablefish fishery. The fishery is currently managed as a derby fishery which has become intolerably short. The data to be collected is intended to assist the Council and Secretary of Commerce in evaluating the effects of alternatives to derby fishery management. These alternatives have substantial allocative implications. There is broad industry support for certain provisions in the alternatives, e.g. a requirement that the owner of the permit or vessel be on board the vessel during fishing operations. However, the information necessary to determine the degree to which such provisions would change or maintain the current practices is not available. The questions to be asked of vessel and permit owners in the fixed gear sablefish sector will cover the following topics: legal organization of ownership (e.g. individual, partnership, corporation, etc.), participation of the vessel owner in fishing operations, status of family members as participants in the fishing operation, number of employees, number of years of participation in the fishery, vessel's home port, number of dependents, dependence on fishing income, level of household income. Questions on other social characteristics (age, sex, marital status, education level) may also be asked.

#### II. Method of Collection

The survey will be administered through the mail. Following the initial mailing a reminder post card will be sent. Nonrespondents will be sent a second mailing of the questionnaire.
