DEPARTMENT OF ENERGY

Programmatic Spent Nuclear Fuel Management and Idaho National Engineering Laboratory Environmental Restoration and Waste Management Programs

AGENCY: Department of Energy.

ACTION: Amendment to Record of Decision.

SUMMARY: The Department of Energy (DOE) has issued an amendment to the

May 30, 1995 Record of Decision on the Programmatic Spent Nuclear Fuel Management and Idaho National Engineering Laboratory Environmental Restoration and Waste Management Programs Final Environmental Impact Statement (60 FR 28680, June 1, 1995). The May 30, 1995 Record of Decision includes a decision to regionalize the management of DOE owned spent nuclear fuel, by fuel type, and also includes decisions concerning environmental restoration and waste management programs at the Idaho National Engineering Laboratory. This amended Record of Decision reflects the October 16, 1995 Settlement Agreement among DOE, the State of Idaho and the Department of the Navy pertaining to spent nuclear fuel shipments into and out of the State of Idaho. The Settlement Agreement was entered as a Consent Order by the U.S. District Court for the District of Idaho on October 17, 1995, which resolved litigation between the State of Idaho and DOE. See, *Public Service Co. of Colorado v. Batt*, No. CV 91-0035-S-EJL (D. Idaho) and *United States v. Batt*, No. CV-91-0065-S-EJL (D. Idaho). This amended Record of Decision does not modify or rescind any of the provisions of the May 30, 1995 Record of Decision, except as discussed below.

ADDRESSES: Copies of the Department of Energy Programmatic Spent Nuclear Fuel Management and Idaho National Engineering Laboratory Environmental Restoration and Waste Management Programs Final Environmental Impact Statement (DOE/EIS-0203-F), and the May 30, 1995 Record of Decision are available in the public reading rooms and libraries identified in the Federal Register Notice that announced the availability of the Final Environmental Impact Statement (60 FR 20979, April 28, 1995).

SUPPLEMENTARY INFORMATION:

Department of Energy Programmatic Spent Nuclear Fuel Management

This amended Record of Decision reduces the number of shipments of spent nuclear fuel into the State of Idaho. As a result, there are differences in the number of spent nuclear fuel shipments and inventories from those listed in Tables 3.1 and 3.2 of the May 30, 1995 Record of Decision. Tables 1.1 and 1.2 of this amendment hereby revise Tables 3.1 and 3.2, respectively, of the May 30, 1995 Record of Decision to show those differences. Table 1.1 shows the origin and interim management destination of specific fuels and the potential number of shipments. One shipment, whether by truck or rail, consists of a single shipping container of spent nuclear fuel. Table 1.2 shows the existing and resulting inventory at DOE's main spent nuclear fuel management locations. The differences include the Fort St. Vrain fuel and 512 shipments of the Hanford Site fuel. The change regarding Fort St. Vrain spent nuclear fuel shipments implements an explicit provision of the October 17, 1995 Consent Order settling the litigation among the State of Idaho, the Department of Energy, and the Department of the Navy. The change regarding spent nuclear fuel at the Hanford site reflects the Consent Order's general limitation of spent nuclear fuel shipments to the Idaho National Engineering Laboratory. Both the Fort St. Vrain and Hanford spent fuels may be safely maintained at their present locations. (See Volume 1, Appendix A, Section 5.1; Volume 1, Section 3.1.1.7; and Volume 1, Appendix E, Section 4.1.3.2.) There are also refinements in the number of spent nuclear fuel shipments to the Idaho National Engineering Laboratory from Argonne National Laboratory-East, Sandia National Laboratory, the Oak Ridge Reservation, Babcock & Wilcox, and Foreign Research Reactors. This Amendment to the Record of Decision is consistent with DOE's mission of managing its spent nuclear fuel safely and efficiently. The environmental impacts associated with the decisions contained in this Amendment were analyzed in the DOE Programmatic Spent Nuclear Fuel Management and Idaho National Engineering Laboratory Environmental Restoration and Waste Management Programs Final Environmental Impact Statement.
