

domestic market. The production process involves injection molding and final assembly. Components purchased from abroad (about 50% of total, by value) include: textile and vinyl liners (parts of footwear), footbeds, fasteners, bearings, laces, wheels and wheel/bearing assemblies, buckle assemblies, strap assemblies (duty rate range: free—10.6%).

Zone procedures would exempt PPCI from Customs duty payments on the foreign components used in the export production. On its domestic sales, the company would be able to choose the duty rate that applies to finished in-line skates (duty free) for the foreign inputs noted above. The application indicates that subzone status would help improve the plants' international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties. Submissions (original and three copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is May 10, 1996. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to May 28, 1996).

A copy of the application and the accompanying exhibits will be available for public inspection at each of the following locations:
