BILLING CODE 4910-14-M

Federal Aviation Administration

Existence of Proposed Powered Parachute Design Standards for Acceptance Under the Primary Category

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability and request for comments.

SUMMARY: This notice announces the existence of and request for comments on proposed powered parachute design standards for acceptance under the primary category rule. The proposed design standards are the culmination of more than 500,000 hours experience as either ultralite or amateur-built vehicles. The applicability is four-place maximum and 2,700 pound maximum weight. The aircraft is designed to be stall proof. The minimum control speed is zero at flare.

DATES: Comments must be received on or before April 18, 1996.

ADDRESSES: Send all comments to: Federal Aviation Administration, Small Airplane Directorate, Aircraft Certification Service, Standards Office, ACE-110, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Terre Flynn, Regulations and Policy Branch, ACE-111, at the address above, telephone number (816) 426-6941.

SUPPLEMENTARY INFORMATION: Any person may obtain a copy of this information by contacting the person named above under **FOR FURTHER INFORMATION CONTACT**.

Comments Invited

Interested parties are invited to submit comments on the proposed design standards. Commenters must identify the design standards (powered parachute) and submit comments to the address above. All communications received on or before the closing date for comments will be considered by the FAA before issuing the final acceptance. The proposed design standards and comments received may be inspected at the Standards Office, ACE-110, Suite 900, 1201 Walnut, Kansas City, Missouri, between the hours of 7:30 a.m. and 4:00 p.m. weekdays, except Federal holidays.

Background

Sport aviation, essentially a fly-for-fun activity, is dependent upon simple, low performance, low cost aircraft. The FAA recognizes this in the creation of primary category (14 CFR 21.17), which establishes simpler process for certification, production control, and establishment of design standards for all types of aircraft. This notice proposes design standards for powered parachute airplanes.

The value of this class of airplane is demonstrated by the number of 14 CFR part 103 ultralite and amateur-built designs currently active. Accordingly, the FAA is proposing and requesting comments on these design standards.

Issued in Kansas City, Missouri, on March 8, 1996.

Henry A. Armstrong,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

DEPARTMENT OF THE TREASURY

Departmental Offices; Proposed Collection; Comment Request

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to comment on an information collection that is due for renewed approval by the Office of Management and Budget. The comment period is required by the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)). Currently, the Office of International Financial Analysis within the Department of the Treasury is soliciting comments
